SEASONING

Careful attention is required to guard against drying the wood too rapidly, particularly in wood with thicker dimension. If not dried properly, the non-uniform stresses involved can cause cupping or twisting upon subsequent resawing or working. Once wood has been dried, it is allowed to "rest" in a climate controlled environment for several days to several months.

GLUE

The use of different glue results in different playing characteristics. Different woods need different glue for best performance. At STIGA we use the best glue and gluing techniques for the best results for each type and combination of wood.

MADE IN SWEDEN FOR THE WORLD CHAMPIONS

The search for the right blade can be a huge challenge, even for the most experienced players. The best blade for one player is not necessarily the best choice for another, as we each have our own personal touch and style, and we tend to react to blades in different ways.

At STIGA we make this important choice easier by ensuring that every blade is of superior quality, and we make blades with the variety of special playing characteristics demanded by experienced players and coaches.

WOOD

Our design process begins by considering the playing characteristics of each of the woods we use. Remember that we're talking in general terms here, since each tree, and even each set of wood, is different. Fortunately, here at STIGA we benefit from having played with hundreds of versions of particular models, so we have learned from vast testing and experience how to design the blades "personalities" to perfectly suit the next generation of World Champions.

CHOOSE THE RIGHT STIGA BLADE

Please observe that this blade table only compares the STIGA blades related to each other. The following characteristics decide the table mentioned beneath. The hardness of the veneers, the blades total weight, the thickness of the blade

WRB THE WRB SYSTEM accelerates the blade face for faster returns, more power and extra sensitivity of touch.

CR THE CR SYSTEM is when front part of the blade is UV-finished, which yields a reasonably increased speed to the ball.

OVERSIZE OVERSIZE has thicker blade that offers approximately 10% extra speed compared to conventional blades. Larger head offers extra stability of touch and feel.

CRYSTAL THE CRYSTAL TECHNOLOGY increase your speed. Normal blade treatments use regular lacquer, but Crystal Technology employs a transparent hydrophilic gel lacquer that STIGA specially developed.

VPS VPS (The Veneer Precision System) treats the veneers with a unique and exact heating and cooling process. This results in a very solid balance and fantastic feel.

DIAMOND TOUCH TECHNOLOGY gives the outer veneers extra hardness and the surface an incredibly smooth finish.

NCT THE NCT TECHNOLOGY blades use our nano technology.

TEXTREME® TECHNOLOGY A Spread Tow Carbon that increase speed and sweet spot on the blade

and the different effects of the unique STIGA blade technologies (WRB, CR etc...), Use this blade table as guidance for you to make the right choice of STIGA blades.

ARCTIC WOOD
 THE BEST OF
 THE NORTH

Arctic Wood is what you get when you combine nature and science. A blade born in nature and crafted by our knowledge and experience. For this blade we have found a rare pale outer veneer which only grows in the cold and deep forests above the arctic circle. This together with our well-renowned VPS (Veneer Precision System) in the second layer results in a unique blade with characteristics like non-other.

ARCTIC WOOD NEW

ART. NO. 1081-XX

CONTROL 65

SPEED 110

ELASTICITY STIFF

VENEER 5 STYLE 11

- Stiff offensive 5-ply blade with characteristics like none other.
- Unique pale outer veneer with rustic feeling.
- Special temperature treated middle veneers (VPS) which reduce vibration and give great stability.
- Perfect combination between nature and science.

Watch the film on [youtube.com/stigatabletennis1944](https://www.youtube.com/stigatabletennis1944)

VPS SERIES
WITH DIAMOND TOUCH

VPS (The Veneer Precision System) treats the veneers with a unique and exact heating and cooling process. This results in a very solid balance and fantastic feel. The Diamond Touch technology gives the outer veneers extra hardness and the surface an incredibly smooth finish.

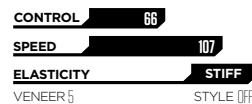

CELERO WOOD
OFFENSIVE CONTROL

In the Celero Wood we introduce a new harder second layer compared to our previous wood series. This second layer has a very high density which generates more power in offensive strokes. The combination between the high density second layer and the soft surface creates a unique blade with excellent feeling and great hitting power. This blade is perfect for the players with a controlled offensive style of play.

ETERNITY VPS V

ART. NO. 3010-XX

- Offensive 5-ply blade build to suite today's modern game.
- Special temperature treated middle veneers (VPS) Which reduces vibrations and gives great stability.
- Surface with extra hardness and smooth finish thanks to the Diamond Touch technology.
- Developed in close collaboration with the Chinese National Team.

EMERALD VPS V

ART. NO. 1099-XX

- Offensive 5-ply blade.
- Green Ebenholz outer veneers with extra hardness.
- Special temperature treated middle veneers (VPS) gives great stability.
- Surface with extra hardness and smooth finish thanks to the Diamond Touch technology.
- Built to suite today's modern game: aggressive receives and powerful topspin shots.

INFINITY VPS V

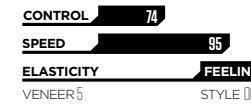

ART. NO. 1618-1005-XX

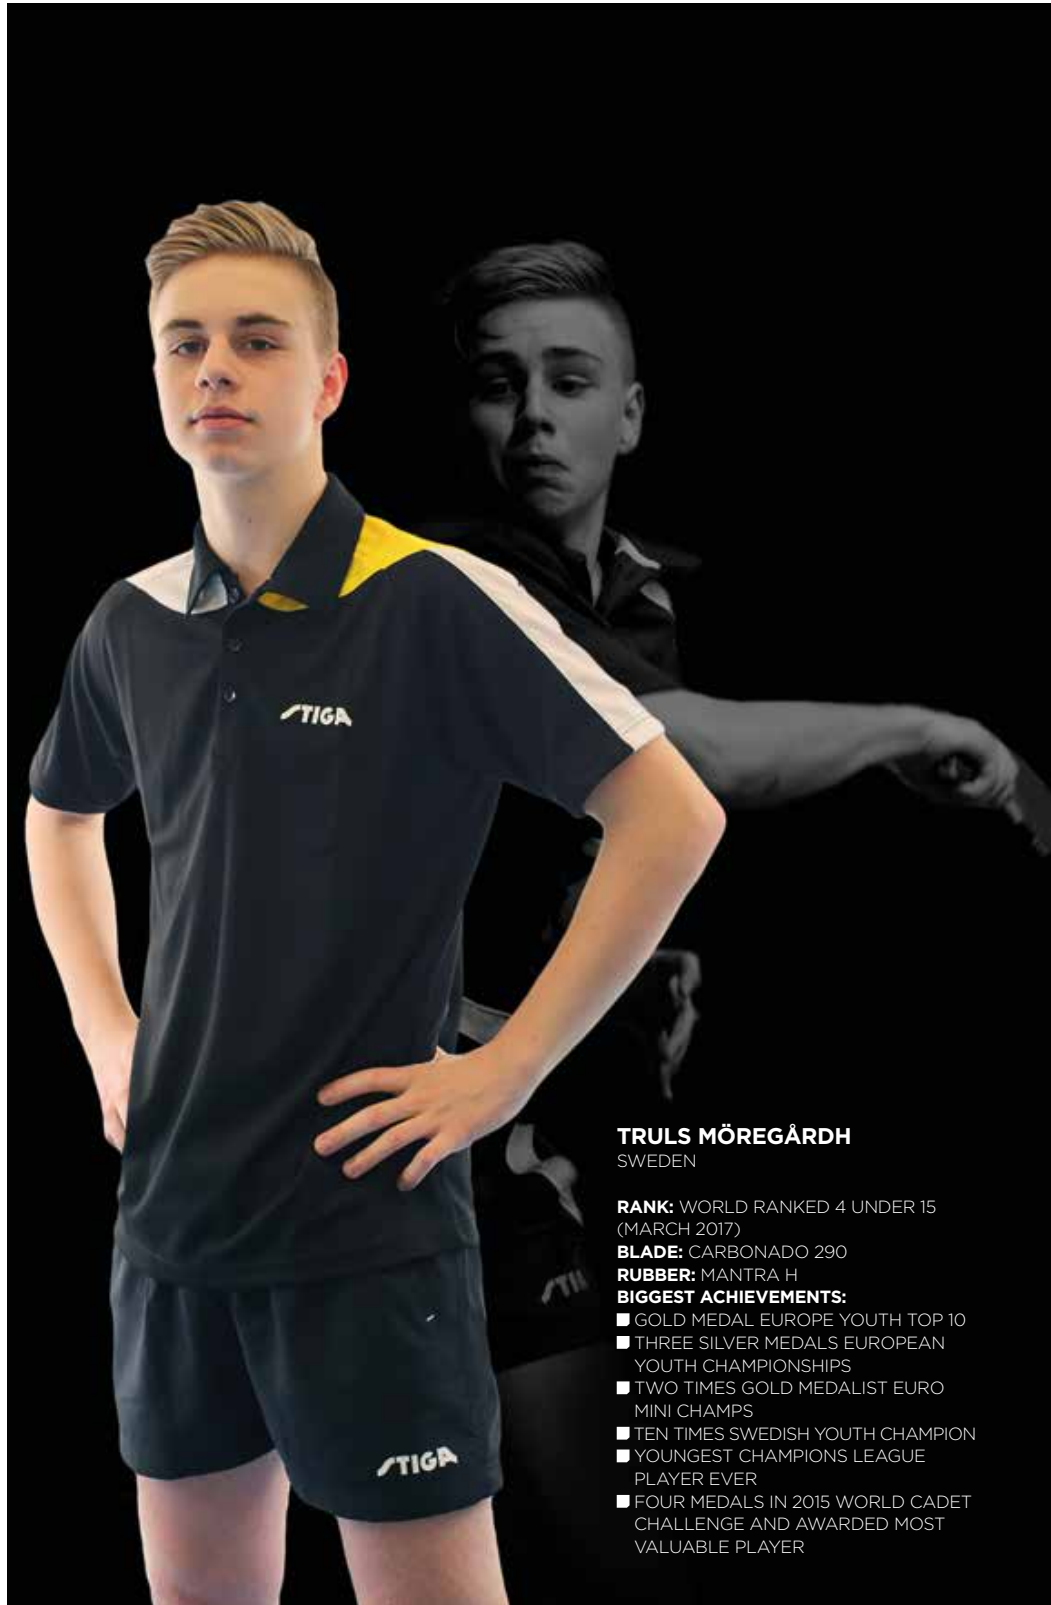

- Lightweight 5-ply offensive blade.
- Special temperature treated middle veneers (VPS) gives great stability.
- Surface with extra hardness and smooth finish thanks to the Diamond Touch technology.
- Built to suite today's modern game: aggressive receives and powerful topspin shots.
- Used by Fan Zhendong.

CELERO WOOD NEW

ART. NO. 1072-XX

- Controlled offensive 5-ply.
- New harder second layer with high density.
- New combination of high density hard wood and soft surface.
- Surface with extra hardness and smooth finish thanks to the Diamond Touch technology.

TRULS MÖREGÅRDH
SWEDEN

- RANK:** WORLD RANKED 4 UNDER 15 (MARCH 2017)
- BLADE:** CARBONADO 290
- RUBBER:** MANTRA H
- BIGGEST ACHIEVEMENTS:**
 - GOLD MEDAL EUROPE YOUTH TOP 10
 - THREE SILVER MEDALS EUROPEAN YOUTH CHAMPIONSHIPS
 - TWO TIMES GOLD MEDALIST EURO MINI CHAMPS
 - TEN TIMES SWEDISH YOUTH CHAMPION
 - YOUNGEST CHAMPIONS LEAGUE PLAYER EVER
 - FOUR MEDALS IN 2015 WORLD CADET CHALLENGE AND AWARDED MOST VALUABLE PLAYER

CARBONADO SERIES
ANOTHER ANGLE
OF CARBON

With the Carbonado blades we have taken the carbon blade manufacturing to a new level by using the made in Sweden carbon technology known as TeXtreme®. The blades are built with five layers of wood and two layers of lightweight TeXtreme® Spread Tow Carbon fibers. This unique and patented carbon is the first of its kind and has never before been experienced in Table Tennis.

The special TeXtreme® Spread Tow Carbon is flexible in only one direction, either flexural or torsional, making it possible in the manufacturing process to adjust and improve the ball trajectory and speed to accommodate playing style. The two layers of carbon are applied in a 45 degree angle or a 90 degree angle.

The Carbonado blades offers the player a personalized Sweet Spot. The Carbonado 45, 145 & 245 with its torsional bendability gives a wider Sweet Spot and the Carbonado 90, 190 & 290 and its flexural bendability gives a higher Sweet Spot.

Experience the result of years of research and engineering. Experience the TeXtreme® Carbon feeling!

The new Carbonado 245 and Carbonado 290 blades are constructed with thicker TeXtreme® 200 gram per m² carbon fiber, providing extreme power and carbon feel.

These two new additions to the Carbonado family are built with the same expert processes and quality materials as the original Carbonado 145 and Carbonado 190, with one difference - the Carbonado 245 and 290 contain 200 gram per m² carbon fiber while the original Carbonado 145 and 190 contains 100 gram per m² carbon fiber.

Choose Carbonado 245 and 290 for top quality, expert craftsmanship, and outstanding performance, along with increased hitting power and carbon feeling.

CHOOSE YOUR SPEED

CARBONADO 45 & 90

64 gram Carbon fiber per m².

CARBONADO 145 & 190

100 gram Carbon fiber per m².

CARBONADO 245 & 290

200 gram Carbon fiber per m².

**CARBONADO 290** NEW

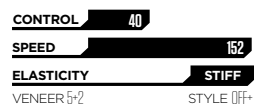

ART. NO. 1064-XX

- Carbonado 290 is constructed with carbon layers in a 90 degree angle.
- 90 degree angle provides flexural bendability which gives the blade a stiff feel with great stability and high speed.
- 200 gram carbon fibre per m².
A thicker TeXTreme® carbon fibre for increased power and carbon feel.
- High personalized sweet spot.
- Used by Truls Möregårdh.

CARBONADO 245 NEW

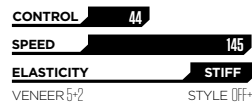

ART. NO. 1063-XX

- Carbonado 245 is constructed with carbon layers in a 45 degree angle.
- 45 degree angle provides torsional bendability which gives the blade more flexibility and increased stiffness.
- 200 gram carbon fibre per m².
A thicker TeXTreme® carbon fibre for increased power and carbon feel.
- Wide personalized sweet spot.

CARBONADO 190

ART. NO. 1060-XX

- Carbonado 190 is constructed with Carbon layers in a 90 degree angle.
- 90 degree angle provides flexural bendability which gives the blade a stiff feel with great stability and high speed.
- The longer and flatter trajectory makes it an excellent choice for players who want to command the gameplay with high speed strokes.
- High personalized sweet spot.
- 100 gram Carbon fibre per m².

CARBONADO 145

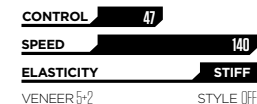

ART. NO. 1065-XX

- Carbonado 145 is constructed with Carbon layers in a 45 degree angle.
- 45 degree angle provides torsional bendability which gives the blade more flexibility and increased stiffness.
- The high trajectory makes it a perfect choice for the offensive player who looks for good speed and stability combined with excellent control.
- Wide personalized sweet spot.
- 100 gram Carbon fibre per m².

CARBONADO 90

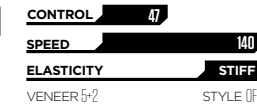

ART. NO. 1061-XX

- Carbonado 90 is constructed with Carbon layers in a 90 degree angle.
- 90 degree angle provides flexural bendability which gives the blade a stiff feel with great stability and high speed.
- The longer and flatter trajectory makes it an excellent choice for players who want to command the gameplay with high speed strokes.
- High personalized sweet spot.
- 64 gram Carbon fibre per m².

CARBONADO 45

ART. NO. 1062-XX

- Carbonado 45 is constructed with Carbon layers in a 45 degree angle.
- 45 degree angle provides torsional bendability which gives the blade more flexibility and increased stiffness.
- The high trajectory makes it a perfect choice for the offensive player who looks for good speed and stability combined with excellent control.
- Wide personalized sweet spot.
- 64 gram Carbon fibre per m².

HARDWOOD SERIES
WHEN NATURE MEETS
SCIENCE

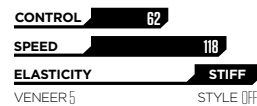

Hardwood blades balance speed, weight, flexibility and trajectory for an unbeatable formula. These are developed in close cooperation with our top players and the Chinese National Team to meet their demands for the best high-performance blades. Each ply of the Hardwoods carefully handpicked to ensure the very best wood grain and quality. The highquality wood used in the these blades is very

hard to find, so producing these blades is a time-consuming and labor-intensive process. The results are worth it! The mixture of special and unique Hardwood, enhanced with STIGA's scientific engineering and NCT (Nano Composite Technology) results in the hardwood blades that will be most in demand for the future!

ROSEWOOD XO

ART. NO. 1092-XX

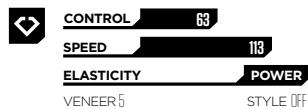

- Offensive 5-ply blade for the offensive player who still puts focus on control.
- Built with exclusive, aged and seasoned Rosewood outer veneers.
- A high quality blade that provides outstanding feeling and touch with a smooth sound.
- Rosewood XO provides extra speed and feeling compared to the Rosewood NCT V.

www.tenismesa.es

ROSEWOOD NCT V

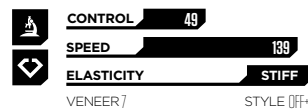

ART. NO. 1078-XX

- Offensive 5-ply blade for the modern attacking game.
- Ideal for the offensive player who demands speed combined with control.
- Exceptional balance of speed, weight, control and trajectory.
- Beautiful hand selected Rosewood veneers of the highest quality.

ROSEWOOD NCT VII

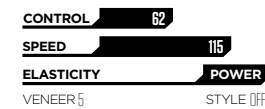

ART. NO. 1088-XX

- Very offensive 7-ply blade with beautiful Rosewood veneers.
- Maximum stability and feeling on powerful strokes.
- Increased sweet spot thanks to the stability of Rosewood veneers.

EBENHOLZ NCT V

ART. NO. 1079-XX

- Offensive 5-ply blade for the modern attacking game.
- A well-balanced state of the art blade, suitable for all playing strategies.
- Beautiful hand selected Ebenholz veneers of the highest quality.

EBENHOLZ NCT VII

ART. NO. 1089-XX

- Very offensive 7-ply blade.
- Beautiful hand selected Ebenholz veneers of the highest quality.
- Extreme speed and stiffness for the player who want best possible speed and feeling combined.
- Increased sweet spot thanks to the stability of Ebenholz veneers.

CC SERIES
PURE POWER

The very unique CC blades are developed in close cooperation with Liu Guoliang, Xu Xin and other members of the Chinese National Team. The Chinese team is always talking about how important the trajectory of the ball is. With a longer trajectory you can push your opponent away from the table and take control of rallies and the game. Both the CC5 and CC7 have carbon layers inside, along with STIGA's famous NCT and Crystal treatment on the surface.

CC5 NCT

ART. NO. 1093-XX

- Offensive 5+2-ply blade with Carbon powder between all the veneers that gives extra speed.
- Provides a long trajectory and power, yet well balanced.
- For the control minded attacking player who still wants power when striking the ball all your shots.

CC7 NCT

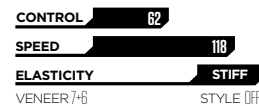

ART. NO. 1097-XX

- Offensive 5+2-ply blade with Carbon Powder between its veneers which provide extra power and speed.
- Outstanding long trajectory in topspin rallies.
- For the attacking player who is looking to play topspin versus topspin.

CLIPPER CC

ART. NO. 1021-XX

- Offensive 7-ply blade.
- The Clipper series is one of the most popular STIGA blade series ever.
- With carbon powder between all the veneers and Crystal Surface that gives more speed to the blade.

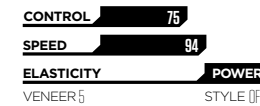

OPTIMUM SERIES
WHEN THE SURFACE IS CRYSTAL CLEAR

Crystal Technology is STIGA's unique process that hardens the surface of the blade, thus increasing its speed. You'll be amazed both by the crystalline appearance of blades treated with Crystal Technology and also by the extra zip on all your shots.

OPTIMUM PLUS

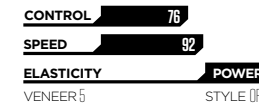

ART. NO. 1048-XX

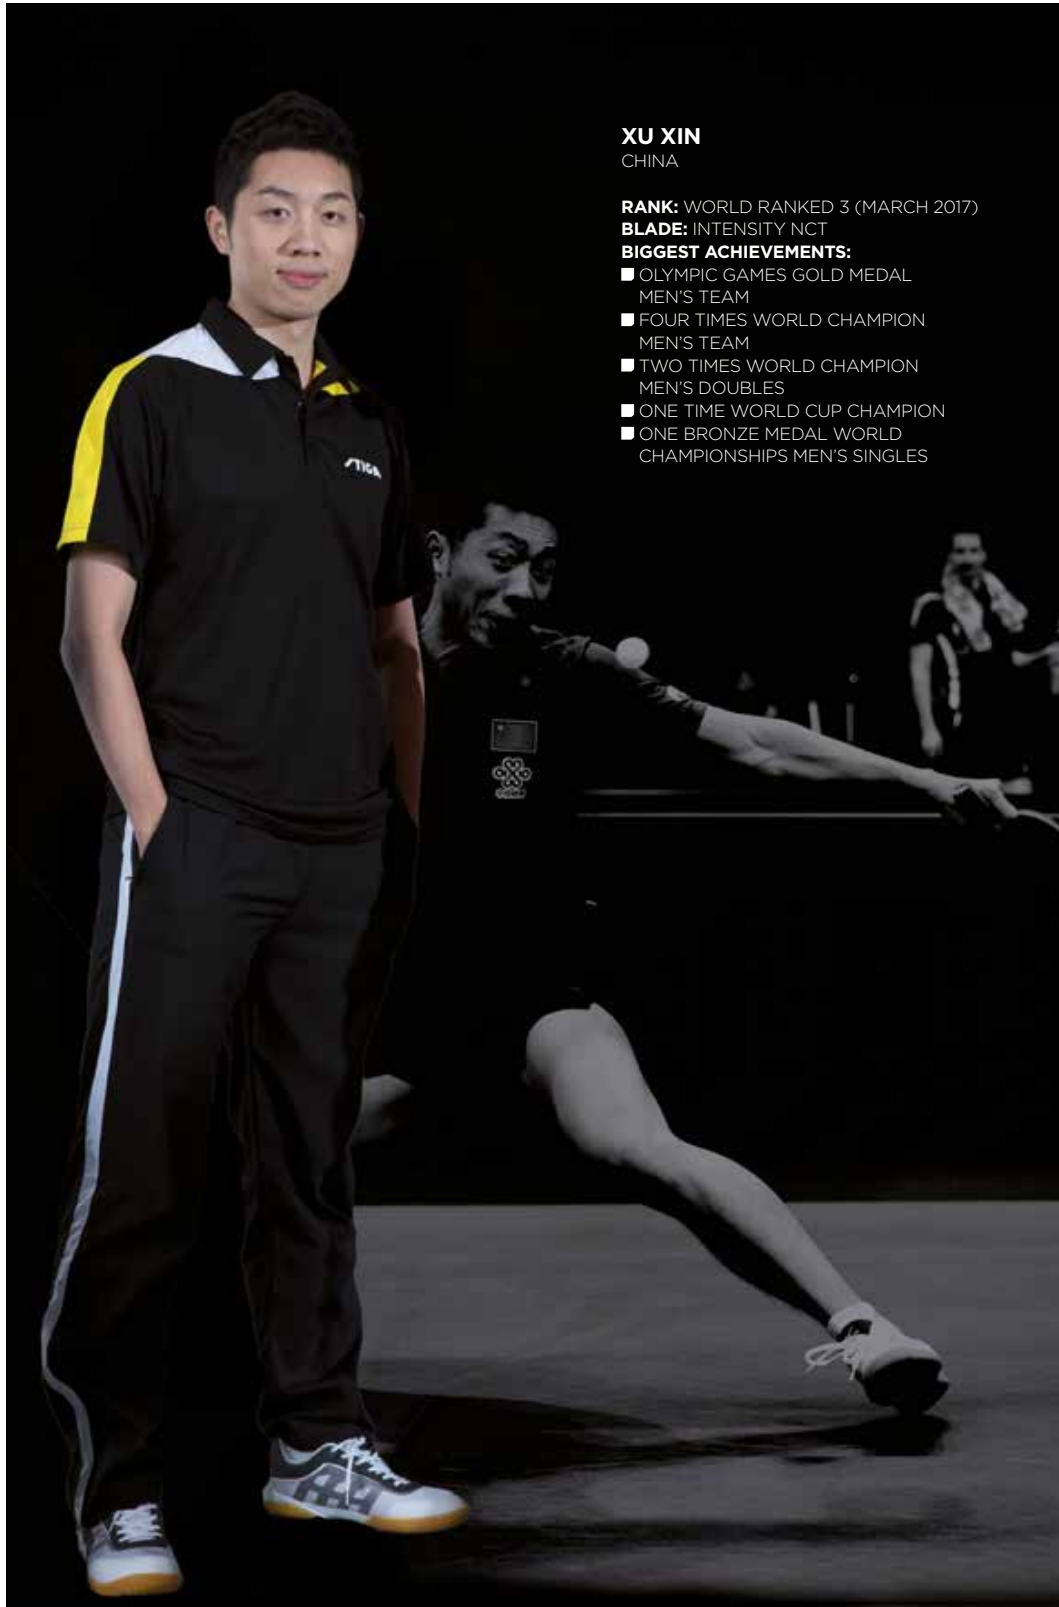

- Lightweight 5-ply offensive blade.
- Built with the same outer plies as the best-selling STIGA Offensive Classic blade.
- Slightly faster than the Optimum SYNC.
- Increased surface hardness and speed thanks to the Crystal Technology.

OPTIMUM SYNC

ART. NO. 1038-XX

- Lightweight 5-ply allround/offensive blade.
- Built for the modern allround/offensive player.
- Increased surface hardness and speed thanks to the Crystal Technology.

XU XIN
CHINA

- RANK:** WORLD RANKED 3 (MARCH 2017)
BLADE: INTENSITY NCT
BIGGEST ACHIEVEMENTS:
- OLYMPIC GAMES GOLD MEDAL MEN'S TEAM
 - FOUR TIMES WORLD CHAMPION MEN'S TEAM
 - TWO TIMES WORLD CHAMPION MEN'S DOUBLES
 - ONE TIME WORLD CUP CHAMPION
 - ONE BRONZE MEDAL WORLD CHAMPIONSHIPS MEN'S SINGLES

NCT SERIES
BALANCED FORCE

The STIGA NCT blades use modern technologies - it is designed for the era that begins with the ITTF speed glue ban in 2008. In fact, it employs a secret ingredient which testing has shown helps you hit the ball harder and increases the life of the blade. The balance between speed, weight and control is outstanding in the NCT blades. With the NCT you will hit the ball harder without sacrificing control.

INTENSITY CARBON

ART. NO. 1023-XX

CONTROL	60
SPEED	124
ELASTICITY	STIFF
VENEER 5+2	STYLE Off

- 5-ply offensive blade with two carbon layers.
- Superb power and speed to all strokes thanks to the carbon layers.
- Great trajectory and speed with an outstanding balance.
- For the attacking player.

INTENSITY NCT

ART. NO. 1022-XX

CONTROL	65
SPEED	105
ELASTICITY	POWER
VENEER 5	STYLE Off

- 5-ply offensive blade with great feeling and control.
- Great trajectory and speed with an outstanding balance.
- For the controlled attacker.
- The NCT allows you to hit the ball harder without sacrificing any control.
- Used by Xu Xin and Zhu Yuling.

HYBRID WOOD NCT

ART. NO. 1039-XX

CONTROL	52
SPEED	129
ELASTICITY	STIFF
VENEER 9	STYLE Off+

- Dynamic and very powerful 9-ply blade.
- Designed for the modern attacking game with powerful topspin shots.
- Tremendous control and feel despite the high speed features.
- The NCT allows you to hit the ball harder without sacrificing any control.

CR SERIES
HARD AS A ROCK

The CR (Combi Revolution) System is a revolution in blade technology. The surface of the blade is UV-finished. This yields an increase in speed. A CR System blade is at least 21% faster than a conventional blade.

ALLROUND WOOD NCT

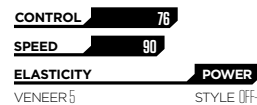

ART. NO. 1059-XX

- Lightweight 5-ply allround blade with outstanding feeling and control.
- Perfect balance between speed, weight and control.
- The NCT allows you to hit the ball harder without sacrificing any control.

OFFENSIVE WOOD NCT

ART. NO. 1049-XX

- Lightweight 5-ply offensive blade with great feeling and control.
- Based on the lightweight attacking Offensive Classic blade.
- Designed for a technical and fast game with full control.
- The NCT allows you to hit the ball harder without sacrificing any control.

DEFENSIVE WOOD NCT

ART. NO. 1027-XX

- Lightweight 5-ply blade with great feeling and control.
- For a very controlled game and also a powerful attacking game as a defender.
- The NCT allows you to hit the ball harder without sacrificing any control.

CLIPPER CR WRB | CR

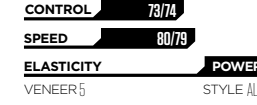

ART. NO. 2025-XX | ART. NO. 1025-XX NOT WRB

- Offensive 7-ply blade.
- The Clipper series is one of the most popular STIGA blade series ever.
- Famous throughout the world among power players for its speed.
- Used by many world class players throughout the years.
- Increased speed compared to the regular Clipper Wood thanks to the CR system.

OFFENSIVE CR WRB | CR

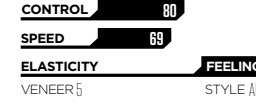

ART. NO. 2035-XX | ART. NO. 1035-XX NOT WRB

- Lightweight 5-ply blade.
- Built to suite the fast and technical offensive/allround player.
- Increased speed with maintained "STIGA touch" because of the CR system.
- WRB-system gives faster returns, more power and extra sensitivity of touch.

ALLROUND CR WRB | CR

ART. NO. 2055-XX | ART. NO. 1055-XX NOT WRB

- Lightweight 5-ply allround blade.
- The perfect balance between speed, weight and feel.
- Increased speed with maintained "STIGA touch" because of the CR system.

HIGH TECH SERIES POWER WITH SENSE

The beautiful STIGA Sense 7.6 is built with a special outer veneer produced through a very long drying process. The result is a fast offensive blade with fantastic feeling and sound that helps the offensive player to retain the upper hand in fast rallies. Sense 7.6, with 7 wood and 6 carbon layers, is based on the very popular and world famous offensive blade, STIGA Carbo 7.6.

SENSE 7.6

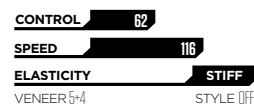

ART. NO. 1096-XX

- Offensive blade built with 7 wood and 6 carbon powder layers.
- With a special outer veneer produced through a very long drying process.
- Fantastic feeling and sound that helps the offensive player to retain the upper hand in fast rallies.
- Based upon the very popular and world famous offensive Carbo 7.6 blade.

TITANIUM 5.4 WRB | 5.4

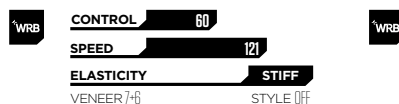

ART. NO. 2091-XX | ART. NO. 1091-XX NOT WRB

- Offensive blade built around 4 ultra-thin layers of titanium and 5 layers of wood veneers.
- Ideal for the offensive player who demands speed combined with control.
- Ultra-thin titanium mixed together with unique bonding glue that makes the blade very powerful.
- WRB-system gives faster returns, more power and extra sensitivity of touch.

CARBO 7.6 WRB

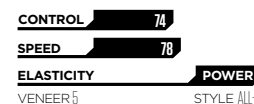

ART. NO. 2041-XX

- Offensive blade built with 7 wood and 6 carbon powder layers.
- Fantastic feeling and sound that helps the offensive player to retain the upper hand in fast rallies.
- Very popular among attacking players in Asia.
- WRB-system gives faster returns, more power and extra sensitivity of touch.

ENERGY WRB

ART. NO. 2060-XX

- Lightweight 5-ply offensive blade.
- A perfect mix between speed and control that is unique to STIGA.
- A combination that creates optimum feel that all players desire.

CARBO OVERSIZE WRB

ART. NO. 2047-XX

- Offensive blade built with 7 wood and 6 carbon powder layers.
- A larger head that offers extra stability of touch and feel.
- Thanks to the innovative construction of Carbo OverSize, the speed is increased.
- The thicker blade offers approximately 10% extra speed compared to conventional blades.

THE CLASSICS
THE MODERNIZED
CLASSICS

The Allround Classic and The Offensive Classic is the first blades manufactured by STIGA. It has been used for over 40 years by many world champions. Today we have updated them with Carbon layers resulting in two blades with more speed and power but still as beautiful as there ancestors.

ALLROUND CLASSIC WRB | ALLROUND CLASSIC

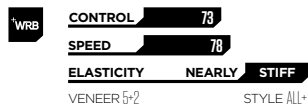

ART. NO. 2050-XX | ART. NO. 1050-XX **NOT WRB**

- Lightweight 5-ply blade with great feeling and control.
- One of the most sold allround blades through all times.
- Suitable for experienced players as well as beginners.
- The perfect blade to start with
- WRB-system gives faster returns, more power and extra sensitivity of touch.

ALLROUND CLASSIC CARBON

ART. NO. 1094-XX

- Lightweight allround 5-ply blade with two carbon layers.
- An updated version of the world famous Allround Classic blade.
- With two added carbon layers, giving extra power and stability for the modern allround player.
- Designed in the classic STIGA design.

OFFENSIVE CLASSIC WRB | OFFENSIVE CLASSIC

ART. NO. 2030-XX | ART. NO. 1030-XX **NOT WRB**

- Offensive 5-ply blade with two carbon layers.
- An updated version of the world famous Offensive Classic blade.
- With two added carbon layers, giving extra power and stability for the modern offensive player.
- Designed in the classic STIGA design.

OFFENSIVE CLASSIC CARBON

ART. NO. 1095-XX

- Offensive 5-ply blade with two carbon layers.
- An updated version of the world famous Offensive Classic blade.
- With two added carbon layers, giving extra power and stability for the modern offensive player.
- Designed in the classic STIGA design.

CLIPPER WOOD WRB | CLIPPER WOOD

ART. NO. 2020-XX | ART. NO. 1020-XX **NOT WRB**

- 7-ply offensive blade.
- Famous all over the world for its speed and used by many world class players.
- For players who want extra power behind their strokes.
- Used by Liu Guoliang as an active player.
- WRB-system gives faster returns, more power and extra sensitivity of touch.

ALLROUND EVOLUTION

ART. NO. 1051-XX

- Lightweight 5-ply allround blade.
- Suitable for the modern allround player with great variation of speed and spin.
- Based on the legendary Allround Classic but slightly faster.

ALL STIGA RUBBERS ARE APPROVED BY ITTF

THE ACS-TECHNOLOGY allows very high speed to be combined with max springiness/elasticity in an ultralight rubber with outstanding control.

THE SYNERGY TECH rubber is the combined collaborative efforts of top table tennis chemists from Sweden and Japan.

BUILT-IN SPEED GLUE EFFECT when you want to achieve maximum power.

MEGA TENSION TECHNOLOGY creates more tension without increasing the weight of the rubber, causing quicker rubber recovery.

TRANSTENSION SPONGE and the exciting material, we have found a formula that will revolutionize and generate maximum tension and sponge power.

THE NCT TECH rubber use our nano technology, and are designed for the era that begins with the ITTF speed glue ban.

POLY BALL OPTIMIZED STIGA RUBBER

POLY BALL OPTIMIZED

LONG TRAJECTORY: We focused on creating a longer trajectory on the ball, as a long trajectory in today's game is more and more important. The combination of spin, speed and long trajectory is unique on STIGA's rubbers; you have never felt this level of play before.

APS: The Advanced Pimple Structure with straight shaped pimples makes the rubber adapt to the ball like never before and provides an explosive and spinny rubber that is reliable in every situation.

OCS: The brand new Oxygen Capsule System is our most advanced rubber technology, specially adapted to the new poly ball. The OCS-sponge generates a very high amount of catapult effect thanks to the precisely measured size of the air pockets. This technology is developed to generate the maximum amount of speed and spin possible.

TENSION RUBBER stands for a truly modern table tennis rubber characterized with a lots of feel, spin variations and intense dynamics.

MANTRA SERIES
THE PERFECT BALANCE
OF SYNTHETIC AND
NATURAL RUBBER

The new STIGA Mantra is developed with the latest Japanese rubber technology and offers the perfect balance of synthetic and natural rubber. This new rubber mixture creates a tension between the surface and the sponge resulting in an incredible catapult effect. Microscopic air bubbles in the sponge (Oxygen Capsule System) provide great speed with a stable and consistent hit and touch. This rubber is perfect for players who require the highest in rubber quality and performance. Mantra is suitable for all types of players, with sponge variation ranging from soft to hard.

MANTRA S NEW

ART. NO. 1708-1605-XX RED
ART. NO. 1708-1601-XX BLACK
SPONGE 1.7 | 1.9 | 2.1

- The soft sponge creates a high spin rubber with excellent feel.
- Perfect soft sponge sound.
- Tremendous feeling from long distance.
- Exceptional control in serve and returns.

MANTRA M NEW

ART. NO. 1708-1605-XX RED
ART. NO. 1708-1601-XX BLACK
SPONGE 1.7 | 1.9 | 2.1

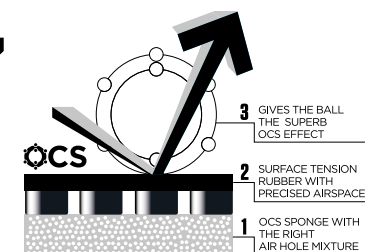

- The medium sponge creates a high speed rubber with great hitting power.
- High speed and feeling from mid distance.
- Gives players the upper hand in spin-spin rallies.
- Produces extreme spin in serves when desired.

MANTRA H NEW

ART. NO. 1708-1705-XX RED
ART. NO. 1708-1701-XX BLACK
SPONGE 1.7 | 1.9 | 2.1

- The hard sponge creates the classic feel with extreme attacking possibilities.
- Very high speed and effectiveness from short distance.
- Excellent blocking abilities in close to table action.
- Heavy rotation topspin in flicks and offensive returns.

GENESIS SERIES
THE BEGINNING IS
THE MOST IMPORTANT
PART OF THE GAME

The STIGA Genesis combines the best of the major table tennis cultures into one rubber. It has a potent synthesis of Japanese/STIGA developed OCS-technology, Swedish knowledge, and a new spin elastic top sheet made in China. Members of the Chinese and Swedish national teams collaborated to create the ultimate balance between east and west. The new top sheet is sustainably developed to increase the durability and lifetime of the rubber. The Oxygen Capsule System in the sponge generates an intense catapult effect and speed.

GENESIS S

ART. NO. 1705-1105-XX **RED**
ART. NO. 1705-1101-XX **BLACK**
SPONGE 2.0|2.2

- The soft sponge provides a high sound with incredible spin.
- Made in China rubber with European characteristic spin elastic feel.
- The OCS-technology provides the rubber with enough catapult effect to keep pressure during long rallies from mid distance.

GENESIS M

ART. NO. 1705-1205-XX **RED**
ART. NO. 1705-1201-XX **BLACK**
SPONGE 2.0|2.2

- The medium sponge provides tremendous hitting power and speed.
- Made in China rubber with European characteristic spin elastic feel.
- The medium sponge is suitable for players who desire a rubber with maximum speed.

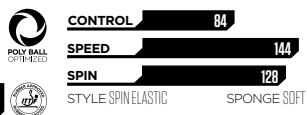

AIROC SERIES
ASTRONOMICAL AMOUNTS
OF SPEED

In Airoc Astro we have multiplied the amount of microscopic air bubbles (Oxygen Capsule System) in the sponge creating more intense catapult effect and speed. The new topsheet works as an energy transfer between the sponge and the ball which provides every stroke with precision and power. Developed together with members of the Chinese National Team to take advantages of the Poly Ball.

AIROC ASTRO S

ART. NO. 1703-0605-XX **RED**
ART. NO. 1703-0601-XX **BLACK**
SPONGE 1.7 [1.9] 2.1

OCs POLY BALL OPTIMIZED STYLe SPIN ELASTIC SPONGE SOFT

- Optimized to produce a soft elastic feel when striking the ball.
- Perfect rubber for offensive attackers who plays with spin, feeling and sound.
- The OCS-Sponge provides the player with enough catapult effect to take advantages of points away from the table.
- Airoc Astro S is the perfect choice for players who wants long trajectory shots with incredible amounts of spin.

AIROC ASTRO M

ART. NO. 1703-0705-XX **RED**
ART. NO. 1703-0701-XX **BLACK**
SPONGE 1.7 [1.9] 2.1

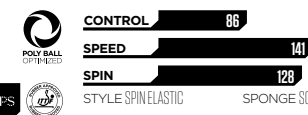

OCs POLY BALL OPTIMIZED STYLe SPIN ELASTIC SPONGE MEDIUM

- Optimized to produce an elastic feel when striking the ball.
- Perfect rubber for offensive attackers who plays with speed, spin and feeling.
- The OCS-Sponge provides the player with enough catapult effect to take advantages of points away from the table.
- Airoc Astro M is the perfect choice for players who wants long trajectory shots with incredible amounts of spin.

AIROC S

ART. NO. 1703-0405-XX **RED**
ART. NO. 1703-0401-XX **BLACK**
SPONGE 1.7 [1.9] 2.1

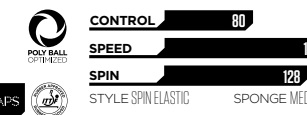

OCs POLY BALL OPTIMIZED STYLe SPIN ELASTIC SPONGE SOFT

- The adoption of the poly ball changes the game for many seasoned all-around players.
- STIGA Airoc S is designed to expand shot selection and feel for control players.
- Creating a rubber sheet to provide this dynamic range of play is made possible thanks to STIGA's new OCS sponge technology (Oxygen Capsule System).
- We have formulated the air pockets within the sponge to withstand the strongest attacks while providing enough spring to go offensive on demand.
- For the ability to control the tempo and to have multiple ways to score then STIGA Airoc S is your perfect choice.

AIROC M

ART. NO. 1703-0505-XX **RED**
ART. NO. 1703-0501-XX **BLACK**
SPONGE 1.7 [1.9] 2.1

OCs POLY BALL OPTIMIZED STYLe SPIN ELASTIC SPONGE MEDIUM

- Research shows the new ITTF tolerances of poly ball impact the ability to create and maintain spin.
- STIGA Airoc M was created to combat this potential powerloss.
- STIGA Airoc M utilizes our newest OCS sponge technology (Oxygen Capsule System) to increase catapult effect without changing the spin ratio. This allows aggressive players to maintain the same spin/speed proportions they have always enjoyed.
- The key to this evolutionary advancement is the delicate balance between the size of the air pockets within the sponge and the elasticity of the top sheet. STIGA's engineers tested many different pip designs and tensions to achieve the perfect rubber for the attacking player.

CALIBRA SERIES
UNLEASH THE POWER OF
THE LONG TRAJECTORY

With the Calibra series we have created a totally new dimension to the game. We focused on creating a longer trajectory on the ball, as a long trajectory in today's game is more and more important. The combination of spin, speed and long trajectory is unique to this rubber series; you have never felt this level of play before. With the Calibra rubbers you will be able to perform strokes and shots never before possible. You will still have control for all the small shots and service return, but when you are attacking you will be in a totally new world. The Calibra series will take your game to another level.

CALIBRA LT

ART. NO. 9825-XX RED
ART. NO. 9826-XX BLACK
SPONGE 1.8|2.0|MAX

- Calibra LT has a medium hard sponge suitable for the highly skilled player.
- Uses the unique Long Trajectory technology specially developed for the CALIBRA-series.
- Built-in speed glue effect for maximum power.
- Revolutionary TransTension Sponge for maximum tension and power.

CALIBRA LT SOUND

ART. NO. 9827-XX RED
ART. NO. 9828-XX BLACK
SPONGE 1.8|2.0|MAX

- Calibra LT Sound has a soft sponge suitable for all types of offensive play.
- Increased control for blocks and receiving serves.
- A crisp clear sound when striking the ball with built-in speed glue effect.

CALIBRA LT SPIN

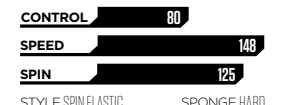

ART. NO. 9868-XX RED
ART. NO. 9869-XX BLACK
SPONGE 1.8|2.0|MAX

- Calibra LT Spin has a medium soft sponge recommended for highly trained attackers.
- Outstanding control for touch shots and service returns.
- New possibilities for spin with Long Trajectory technology.

CALIBRA LT PLUS

ART. NO. 9866-XX RED
ART. NO. 9867-XX BLACK
SPONGE 1.8|2.0|MAX

- Calibra LT Plus has an extra hard sponge for tremendous hitting power.
- Excellent choice for the highly skilled player who demands a combination of spin, speed, power, and long trajectory.

**CALIBRA TOUR S**

ART. NO. 1701-0105-XX **RED** | ART. NO. 1701-0101-XX **BLACK**
SPONGE 1.7 | 1.9 | 2.1

- The soft sponge with the APS-Technology provides good speed and the possibility to shape your shots due to the increased spin features.
- Suitable for players with lower hitting power who need a rubber that helps generate extra speed with a lovely sound of built-in speed glue effect.

**CALIBRA TOUR M**

ART. NO. 1701-0205-XX **RED** | ART. NO. 1701-0201-XX **BLACK**
SPONGE 1.7 | 1.9 | 2.1

- The medium-hard sponge with the APS-Technology provides very high speed and the possibility to shape your shots due to the increased spin capacity.
- Tour M is suitable for players with medium strong hitting power who require a rubber that helps generate more speed and long trajectory.

**CALIBRA TOUR H**

ART. NO. 1701-0305-XX **RED** | ART. NO. 1701-0301-XX **BLACK**
SPONGE 1.7 | 1.9 | 2.1

- The hard sponge with the APS-Technology provides extremely high speed and the possibility to shape your shots due to the increased spin capacity.
- Tour H is suitable for players with strong hitting power who desire a rubber with built-in speed glue effect with maximum power and speed.

**MAGNA TS II**

ART. NO. 9823-XX **RED** | ART. NO. 9824-XX **BLACK**
SPONGE 1.8 | 2.0 | 2.1

- Magna TS II has a very soft sponge which is an outstanding choice for offensive players of almost all playing levels.
- The unique Magna surface makes you feel and hear the amazing sound while striking the ball.

**MAGNA TC II**

ART. NO. 9821-XX **RED** | ART. NO. 9822-XX **BLACK**
SPONGE 1.8 | 2.0 | 2.1

- Magna TC II has a soft sponge which is more dynamic, more sensitive, and with greater spin than ever before.
- With the Long Trajectory technology and TransTension Sponge you can take control early in the topspin rallies and retain the control over your opponents.

**CARBO MC**

ART. NO. 9864-XX **RED** | ART. NO. 9865-XX **BLACK**
SPONGE 1.8 | 2.0 | 2.1

- Uses a medium sponge with great spin
- Designed for club and tournament. players looking for a spinny rubber with excellent control.

**BOOST TP**

ART. NO. 9893-XX **RED** | ART. NO. 9894-XX **BLACK**
SPONGE 1.8 | 2.0 | 2.1

- Boost TP has a hard sponge that really enables the TransTension magic.
- Perfect for leading players who demand ultimate spin and speed combined with a sensitive touch.

**BOOST TC**

ART. NO. 9895-XX **RED** | ART. NO. 9896-XX **BLACK**
SPONGE 1.8 | 2.0 | 2.1

- Boost TC offers a soft sponge which creates a truly sensational touch and feel.
- It gives a clear sound when striking the ball in an offensive rally.

**BOOST TS**

ART. NO. 9897-XX **RED** | ART. NO. 9898-XX **BLACK**
SPONGE 1.8 | 2.0 | 2.1

- Boost TS is an outstanding choice for offensive players of all levels who prefer a very soft sponge.
- Enables players of all abilities to play to their full potential.

**POWER LT**

ART. NO. 1701-0405-XX **RED** | ART. NO. 1701-0401-XX **BLACK**
SPONGE 1.8 | 2.0 | 2.1

- A great choice of rubber for players who want to take the first big step in Table Tennis.

**CHOP & DRIVE**

ART. NO. 9819-XX **RED** | ART. NO. 9820-XX **BLACK**
SPONGE 1.1 | 1.5 | 1.8

- Very soft sponge absorbs the ball and increases the contact time.
- Produces excessive underspin when required.
- Suits the defensive/allround player.

**COBRA 2000**

ART. NO. 9830-XX **RED** | ART. NO. 9831-XX **BLACK**
SPONGE 1.5 | 1.8 | 2.0

- Cobra 2000 has a medium sponge with a specially selected rubber mixture.
- It absorbs a lot of your opponent's spin and gives your play more control.
- Perfect rubber for the player learning to create more advanced shots.

**BOOST TX**

ART. NO. 9891-XX **RED** | ART. NO. 9892-XX **BLACK**
SPONGE 2.0 | 2.1

- Boost TX has a medium sponge with optimum acceleration.
- The TransTension Sponge generates maximum tension and provides a perfect balance between speed, spin, and control.

www.tenismesa.es

**NEOS SOUND**

ART. NO. 9844-XX **RED** | ART. NO. 9845-XX **BLACK**
SPONGE 1.8 | 2.0 | 2.1

- Neos Sound is an offensive rubber with soft sponge.
- Perfect for players who like the feeling and sound of soft sponge.

**NEOS TACKY**

ART. NO. 9846-XX **RED** | ART. NO. 9847-XX **BLACK**
SPONGE 1.5 | 1.8 | 2.0

- Neos Tacky offers control and is very sticky, providing plenty of spin.
- Medium sponge with excellent spin on slow balls.

**MENDO**

ART. NO. 9804-XX **RED** | ART. NO. 9805-XX **BLACK**
SPONGE 1.5 | 1.8 | 2.0

- Mendo is a classic rubber ideal for the offensive player who is looking for control and feeling.
- With a medium hard, resilient sponge.

**MENDO ENERGY**

ART. NO. 9817-XX **RED** | ART. NO. 9818-XX **BLACK**
SPONGE 1.8 | 2.0 | 2.1

- Mendo Energy is a Power-Soft-Rubber with world class world class quality.
- Creates maximum friction on the ball.
- Perfect for the allround/offensive club player.

**INNOVA ULTRA LIGHT**

ART. NO. 9836-XX **RED** | ART. NO. 9837-XX **BLACK**
SPONGE 1.8 | 2.0 | 2.1

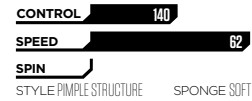

- Innova Ultra Light uses the ACS-Technology in the ultimate way.
- Fantastic feeling in this ultra soft rubber.
- Approximately 10% lighter than a regular rubber.

D.M.V. Sports Madison, S.L.

SCULPTURE

ART. NO. 1706-1305-XX **RED**
 ART. NO. 1706-1301-XX **BLACK**
 SPONGE OX | 1,2 | 1,5

- Sculpture is a long pimple rubber with soft sponge, perfectly suited for the defensive player who desires high control and spin.
- The soft sponge and topsheet combination is developed for the Poly ball.
- It is excellent for producing extreme underspin.

LINER NEW

ART. NO. 1560-0217-XX WHITE/SILVER INCL. SHOE BAG

Shoe Liner is made from a durable flexible polyester fabric that effectively helps keep the foot in the correct position during multi-directional movements and high performance activities. Reinforced sides provide the player with a high level of fit and stability. The upper part of the shoe is constructed with lightweight breathable material, which reduces the buildup of heat and humidity inside the shoe and gives the foot a dryer and cooler environment. Liner allows you full use of your footwork due to the excellent grip provided by natural rubber in the outsole. Constructed using specifically designed flex grooves to improve balance and feel of the ground, Liner uses STIGA's well-renowned soft EVA innersole for maximum comfort.

SIZES AVAILABLE: 36-46

AGILITY

ART. NO. 1560-0816-XX **BLACK/ORANGE/SILVER**

Agility meets all the requirements for the modern fast table tennis game. This flexible and light shoe enables maximum speed and quickness on every floor surface. Agility allows you full use of your footwork due to excellent floor contact provided by natural rubber in the sole. Reinforced sides and leather fabric offer outstanding stability in both forward and sideways movements. Agility has STIGA'S soft EVA innersole for maximum comfort.

SIZES AVAILABLE: 36-46

INSTINCT II

ART. NO. 1560-0715-XX **WHITE/NAVY/SILVER**

Specially developed innersole in soft EVA to give you maximum comfort. Instinct II has a unique and special made outsole that's developed for table tennis. The pattern and grip areas are unique and one of its kind and will give you the perfect grip in all your quick moves at the table. The outsole has extra soft EVA at the forefoot and at the heel, all this to ensure that you will get the best feeling against the floor and maximum support for your foot.

SIZES AVAILABLE: 34-46

TABLES TECHNOLOGY

COMPACT STORAGE SYSTEM

COMPACT SYSTEM

SAFETY SYSTEM

CSS COMPACT STORAGE SYSTEM

Table tennis has always occupied many people within a limited space. Training and competitions often require many tables to be available at the same time. CSS tables make it easier to store large numbers in a small space.

- The table halves are stored folded into each other, thus reducing drastically the space required.
- The height of the table is only 155 cm.
- Each table leaf has its own wheeled base, which means the table is easier to handle.

CS COMPACT SYSTEM

The new folding system minimizes the risk of injuries during table storage due to its unique compact design.

NET INCLUDED

Some of our tables comes with suitable net.

SAFETY BAR

The Safety Bar will prevent that a child can stay between the table tops.

T PATENT SYSTEM FOR UNLOCKING

By pulling the metal handle, which is connected to a wire, the safety devices will be released and the table can be placed into playing position.

ONLY FOR INDOOR USE

This table should only be used for indoor playing.

OUTDOOR

This symbol indicates that the table is approved for outdoor playing.

EU EN-NORM 14468-1

- CLASS A
- CLASS B
- CLASS C
- CLASS D

I INTERNATIONAL MEASUREMENTS FOR PLAYING:

LENGTH = 274 cm
WIDTH = 152,5 cm
HEIGHT = 76 cm

ELITE ROLLER CSS

Eslöv AI's international table tennis academy in Eslöv aims to train young talents from all over the world to professional table tennis players. The training is based on a holistic approach - needs are central.

GUIDANCE: Trainers, coaches and advisors use the same basic guiding principles to help the players:

- Communication - between coaches, players, advisors and parents.
- Planning - careful planning both long and short term.
- Clarity - the objectives, means and methods.
- Follow-up - each term, regular monitoring and evaluation of players' development and attainment.
- Adjustment - if any changes need to be made they will be do so accordingly.

OPTIONS: Each player is offered a training schedule that suits them. Players can study at the high school in various ways. It is possible to come and train for long periods in Eslöv, with sessions tailored to the player's needs, and it is possible to organize short training camps with the same opportunities.

All training camps include personal training, coaching and advice. This is something that players can get access to outside the academy.

PICTURES COURTESY OF RP MEDIA

We're extremely happy and proud to announce that we will be naming the new arena STIGA Sports Arena in Eskilstuna. Sports and active recreation is something that we at STIGA Sports are very passionate about and the naming of the new fantastic arena is an excellent way for us to contribute to an active sports life and active recreation in Eskilstuna. We're excited about this long term cooperation where we can strengthen both Eskilstunas and STIGA Sports trademark nationally and internationally.

The arena is designed for sports events, concerts, larger conventions and fairs. The main arena holds 3700 seats and is diversifiable for different areas of use. The arena will have a high environmental profile both in design and during events. It will be classified as gold by the Swedish Green Building Council, thanks to it's low energy consumption and the choice of construction material used, which has less impact on the environment.

ILLUSTRATION BY AQ ARKITEKTER.

BLADES

ELASTICITY: The control of the ball is affected when the ball gets in contact with the bat. The elastic properties of a blade make you feel this contact. It depends on the players what type of elasticity he or she likes best. Take these categories into consideration and you will surely find the right blade for you.

ELASTIC: Offering low speed with maximum control. Mostly used by the cautious defender.

FEELING ELASTIC: The enhanced touch and feel characteristics are a distinct advantage for players who like to be in command of control and accuracy for the allround spin game.

POWER ELASTIC: Power elastic blades benefit the spin player a wide variety of attacking styles.

NEARLY STIFF: For consistent powerful forehand and backhand top spinning loop play. Nearly stiff blades are ideal for players who want to set the momentum and dictate the play.

STIFF: The ultimate selection for the direct power-hitting player who primarily concentrates on pure speed than control.

RUBBERS

SPONGE HARDNESS:

SOFT: Soft sponges provide a better ball control. The spin remains the same while the speed is slightly reduced. Common among players that what to have a great sound during their game.

MEDIUM: Medium sponge is superb for active and powerful players. A well balanced relation between control, speed and spin.

HARD: These sponges provide more speed but less control of the ball when striking the ball.

SURFACE: The topsheet of the rubber.

STICKY: This rubber sheet offers much control and is very sticky, which provides plenty of spin when striking the ball.

CONTROL ELASTIC: They develop spin elasticity even at the low speed, and give you more control and more fun. Suitable for control-minded players that want to have the extra touch in their game.

STICKY ELASTIC: Slightly sticky rubbers with very good spin dynamics and ball control while playing at a high speed, both away and near the table.

OFF ELASTIC: Intelligent mixed between speed and spin dynamic. Off elastic rubbers is for speed players that use a lot of top spin in their game.

SPIN ELASTIC: Spin elastic rubbers are for the modern top table tennis. They are as fast as the off elastic rubbers, but have an additional spin component. Very sophisticated technology.

We're proud partners and suppliers to more than 25 national federations and teams.
