FLAME ★★★★★

ART. NO. 1214-2717-01

4-star Flame is the fastest bat in our 4-star range. This 7-ply bat is the ultimate combination of two revolutionary technologies; ACS and TUBE, offering you increased speed, spin and control.

FLOAT ★★★★★

ART. NO. 1214-2617-37

4-star Float is ideal for offensive minded players who want that extra touch and control when attacking and counter-attacking. The straight handle uses our well-renowned WRB-technology which accelerates the blade face for faster returns and more power.

FLASH ★★★★★

ART. NO. 1214-2517-01

4-star Flash is perfect for the player who wants a fast 5-ply bat with high speed and stabile control. The ACS-technology provides the rubber with great spin without losing the feeling and sensitivity of touch.

TOTAL ★★★

ART. NO. 1213-2417-01

3-star Total is the fastest blade in our 3-star range. The 7-ply core makes this a perfect choice for the powerful varied offensive player who wants unrivalled levels of power and feeling in their game. 3-star Total is the result of more than 70 years of research and development.

TORCH ★★★

ART. NO. 1213-2317-37

3-star Torch uses our Crystal Technology, a transparent hydrophilic gel lacquer we specially developed to increase the speed and built in glue effect of the bat.

TOUGH ★★★

ART. NO. 1213-2217-01

3-star Tough, with concave handle and 5-ply wood, is a well-balanced 3-star bat with excellent speed and spin in combination with high control and feeling.

BAT AND BALL HOLDER

CSS COMPACT STORAGE SYSTEM

Table tennis has always occupied many people within a limited space. Training and competitions often require many tables to be available at the same time. CSS tables make it easier to store large numbers in a small space.

- The table halves are stored folded into each other, thus reducing drastically the space required.
- The height of the table is only 155 cm.
- Each table leaf has its own wheeled base, which means the table is easier to handle.

CS COMPACT SYSTEM

The new folding system minimizes the risk of injuries during table storage due to its unique compact design.

NET INCLUDED

Some of our tables comes with suitable net.

SAFETY BAR

The Safety Bar will prevent that a child can stay between the table tops.

T PATENT SYSTEM FOR UNLOCKING

By pulling the metal handle, which is connected to a wire, the safety devices will be released and the table can be placed into playing position.

ONLY FOR INDOOR USE

This table should only be used for indoor playing.

OUTDOOR

This symbol indicates that the table is approved for outdoor playing.

We're extremely happy and proud to announce that we will be naming the new arena STIGA Sports Arena in Eskilstuna. Sports and active recreation is something that we at STIGA Sports are very passionate about and the naming of the new fantastic arena is an excellent way for us to contribute to an active sports life and active recreation in Eskilstuna. We're excited about this long term cooperation where we can strengthen both Eskilstunas and STIGA Sports trademark nationally and internationally.

The arena is designed for sports events, concerts, larger conventions and fairs. The main arena holds 3700 seats and is diversifiable for different areas of use. The arena will have a high environmental profile both in design and during events. It will be classified as gold by the Swedish Green Building Council, thanks to it's low energy consumption and the choice of construction material used, which has less impact on the environment.

THE ACS-TECHNOLOGY allows very high speed to be combined with max springiness/elasticity in an ultralight rubber with outstanding control.

THE WRB SYSTEM accelerates the blade face for faster returns, more power and extra sensitivity of touch.

THE CRYSTAL TECHNOLOGY increase your speed. Normal blade treatments use regular lacquer, but Crystal Technology employs a transparent hydrophilic gel lacquer that STIGA specially developed.

THE NCT TECHNOLOGY blades use our nano technology.

TUBE is a technology where the middle veneer with "micro-channels" lengthways in the middle ply of the blades. The channels are then filled with different materials depending on the blade's desired characteristics.

BALSA: Makes the blade lighter.

RUBBERS That are approved by ITTF.
