V > 11 NEW TYPE RUBBER

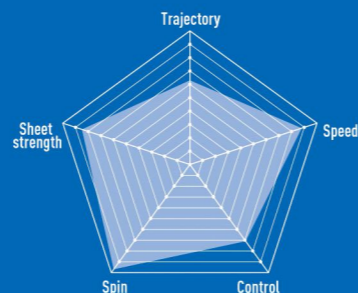

OFF rubber with new VICTAS "LIGHTNING TENSION"

The new "Lightning Tension" technology is based on the proven "High Energy Tension" technology. Thanks to the innovative material composition, V > 11 is approx. 10% lighter at the same performance level. Energy transfer to the ball is maximized and top players of all generations can use this advantage for their playing style.

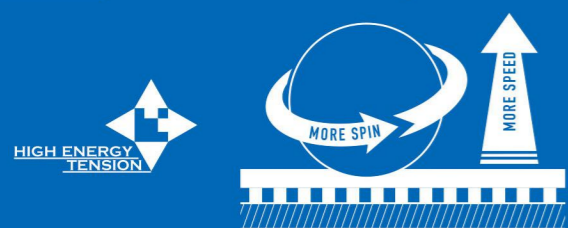

V>11 Extra NEW Hardness 47,5±3
46,90€ MAX 2,0

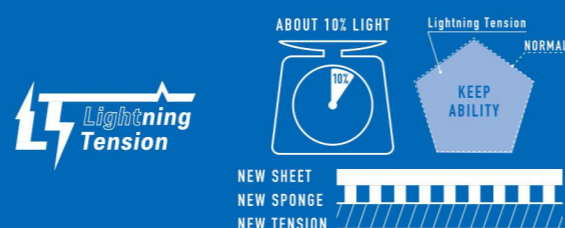

The V>11 Extra is an OFF rubber for the new generation of top-level players on the lookout for a new rubber which perfectly combines the features of the V>15 series with less weight. Thanks to the innovative material composition of the new "Lightning Tension" design, V>11 Extra is approx. 10% lighter than V>15 Extra at the same performance level. The new 47.5° OFF sponge combines power and vigor with excellent feel, and the aggressive spin produced by the optimized top sheet leaves nothing to be desired.

TOPICS VICTAS rubber technologies

High Energy Tension is the result of GJ Tec, the cooperation of our German and Japanese development team. The new rubber composition combined with optimized pips geometry gives all VICTAS High Energy Tension top rubber sheets extreme tension and power.

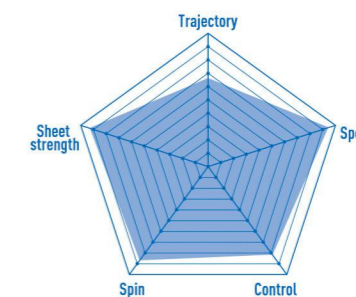

Thanks to the innovative material composition V > 11 is approx. 10% lighter at the same performance level. Energy transfer to the ball is maximized and top players of all generations can use this advantage for their playing style.

V>15 Extra MAX 2,0 **49,90€**

Hardness 47,5±3

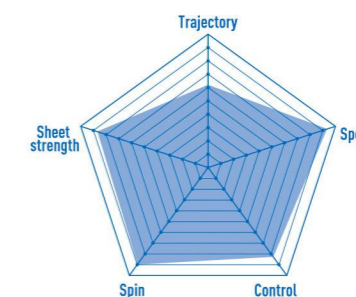

The ultimate weapon for aggressive offensive players! V>15 Extra is a high-end offensive rubber which will enable you to perform on a new level in topspin rallies. Feel the ultimate power and high efficiency energy conversion of the innovative 47.5° offensive sponge and experience the unlimited potential of the spin-optimized top rubber sheet! Demanding offensive players who rely on aggressive topspins as well as topspin-to-topspin rallies will take their play to a new level with V>15 Extra!

V>15 Stiff MAX 2,0 **49,90€**

Hardness 45,0±3

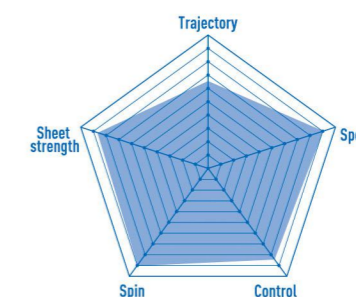

The ultimate weapon for offensive players - uncompromising speed and spin! V>15 Stiff combines the power of V>15 Extra with the spin potential and elasticity of V>15 Limber. The special, newly developed 45° offensive sponge sets a new benchmark for ambitious attackers relying both on aggressive power table tennis and well-placed spin variants. Thanks to the efficient energy conversion and excellent playing balance of V>15 Stiff, speed-oriented players have all they need to enter the next level!

V>15 Limber MAX 2,0 **49,90€**

Hardness 40,0±3

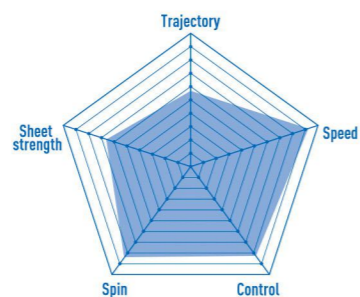

The ultimate weapon for spin-oriented offensive players! V>15 Limber is an elastic high-end offensive rubber with excellent spin features and catapult effect. Feel the power and elasticity of the soft 40° offensive sponge and experience the enormous spin potential of the innovative top rubber sheet! Modern offensive players who rely on spinny, variant rich topspin play will enjoy a whole new dimension of opportunities with V>15 Limber!

V>01

MAX 2,0 1,8 44,90€

Hardness
47,5±3

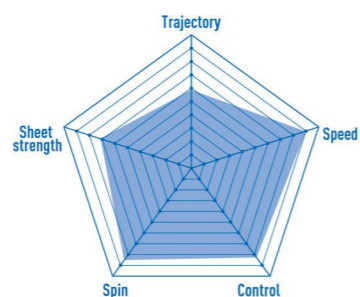

The new "Power & Balance" philosophy of the V>01 rubber combines the power of topspin bombs with feel and precision in your play, so that you remain in control at all times. This sensational feel is the result of the slightly harder, open-pore 47.5° high-performance sponge which provides for a more direct, thus more controlled touch enabling precise placing of the ball. In hard-hit balls (e.g. topspin, smash), the air chambers of the open-pore sponge are compressed, which results in longer ball contact.

V>01 Stiff

MAX 2,0 1,8 44,90€

Hardness
45,0±3

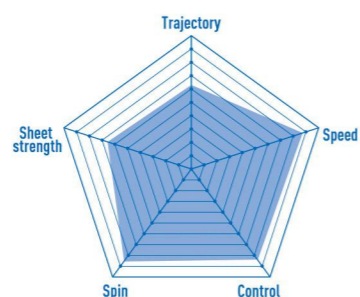

The open-pore, state-of-the-art 45° high-performance sponge which is slightly softer than in V>01 provides for more control in your play ("Power & Balance concept"). With this new sponge / top rubber sheet combination, V>01 Stiff enables extremely fast and spinny topspin strokes with an aggressive ball trajectory. Especially in middistance topspin rallies, the V>01 Stiff rubber unfolds its full potential.

V>01 Limber

MAX 2,0 1,8 44,90€

Hardness
40,0±3

The V>01 Limber rubber is the slightly softer and more controlled version of the VICTAS V>01 premium series for ambitious players. The "Power & Balance" concept was optimized such that the slightly softer sponge design of V>01 enables higher ball trajectories, which significantly increases forgiveness in less-than-perfect topspin strokes. In attacking strokes, the rubber provides for fantastic feel for speed plus inimitable speed glue effect.

V>03 NEW TYPE RUBBER

New OFF rubber from VICTAS with highly balanced features

In modern table tennis, a good trajectory and great spin potential are becoming more and more important. V>03, however, has even more to offer: great spin and excellent feel.

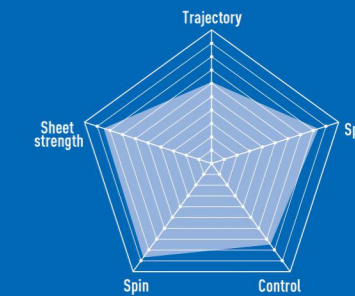

V>03 NEW

Hardness
42,5±3

39,90€

MAX 2,0 1,8

VICTAS' V>03 design goal was to create a rubber meeting all requirements of modern table tennis with a great performance potential. The new 42.5° OFF sponge with built-in "High Energy Tension" technology features excellent sound and catapult effects and high-end speed in hard-hit attacking strokes. The new sponge/top-sheet combination enables great spin production in all kinds of stroke techniques and a high ball trajectory for an excellent feel.

VJ>07 Regular

MAX 2,0 / 1,8 35,90€

Hardness 42,5±3

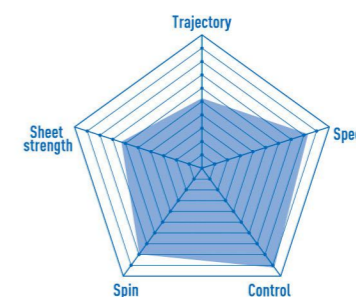

VJ > 07 Regular is a state-of-the-art and well-balanced allround rubber "Made in Japan". It combines the precision and feel of classic allrounders with a gentle speed and catapult effect for aggressive attacking. This makes VJ > 07 Regular the perfect choice for all players who try to keep control in any situation and strive to improve their own attacking skills continuously.

VJ>07 Limber

MAX 2,0 / 1,8 42,90€

Hardness 40,0±3

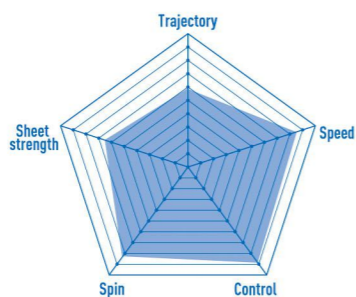

VJ > 07 Limber is a highly elastic OFF rubber "Made in Japan". Thanks to the new, slightly thinner pips structure, this rubber enables variable offensive playing both in close-to-the-table and in middistance rallies. The new soft tension sponge provides for great sound and excellent feel which will reduce the number of faults you produce. VJ > 07 Limber is an elastic "feel-good" OFF rubber with perfect ball feedback and excellent catapult and sound effect which leaves nothing to be desired for variable topspin players.

VJ>07 Stiff

MAX 2,0 / 1,8 42,90€

Hardness 45,0±3

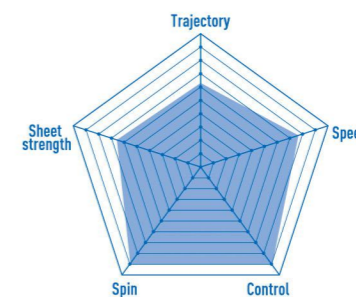

VJ > 07 Stiff is an innovative, well-balanced OFF rubber "Made in Japan". The combination of the new spin-oriented Japanese top sheet with the open-pore, medium-hardness tension sponge makes VJ > 07 Stiff the perfect weapon for modern attackers. The optimized pips geometry allows the production of great spin and provides for perfect coupling of the ball, which makes VJ > 07 Stiff ideal for the new generation of balls. Benefit from excellent balance and the great combination of speed, spin and control.

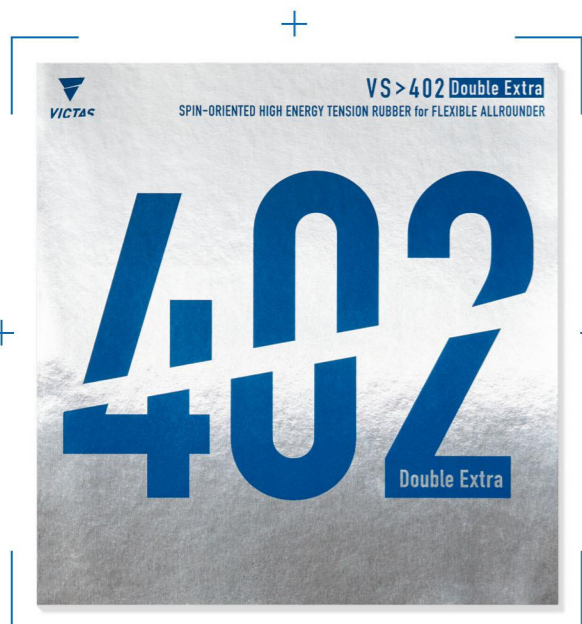

VJC>07 Sticky Extra

MAX 2,0 / 1,8 47,90€

Hardness 47,5±3

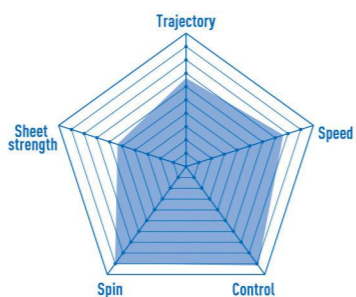

VJC > 07 Sticky Extra is a modern hybrid rubber made by VICTAS. Thanks to the new, harder Japanese sponge texture, the rubber is a perfect combination of control and speed. Hard-hit balls with great acceleration deliver tons of speed which will put your opponent under enormous pressure. The Chinese, slightly sticky top sheet of VJC > 07 Sticky Extra opens up a new dimension of spin and unbelievable serve-and-return quality and control in blocking.

VS>402 Double Extra

MAX 2,0 1,8 42,90€

Hardness
50,0±3

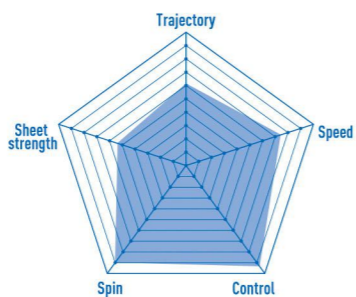

The VS>402 Double Extra is a further development of the very popular VS>401. This innovation combines the very tacky, elastic top rubber sheet with a modern, slightly harder offensive sponge. The new sponge / top rubber sheet combination makes this High Energy Tension rubber the ideal weapon for any spin-oriented allrounder. The extremely tacky and flexible top rubber sheet virtually tacks the ball and produces fantastic spin both in topspin play and in defensive strokes with heavy backspin.

VS>402 Limber

MAX 2,0 1,8 42,90€

Hardness
40,0±3

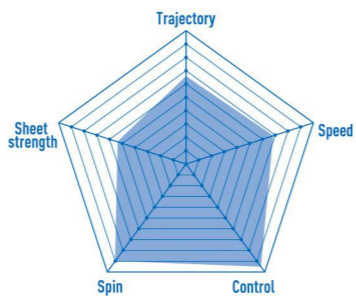

The VS>402 Limber is the softest variant of the tacky VICTAS VS series. The tacky, elastic top rubber sheet was combined with the high-catapult Limber offensive sponge and opens up a new dimension of playing. With the highly tacky top rubber sheet you can put pressure on your opponents with dangerous serve / return variants and spiny topspin / backspin strokes. This unique sponge / top rubber sheet combination creates countless opportunities for flexible allrounders.

VS>401

2,0 1,8 1,5 42,90€

Hardness
57,5±3

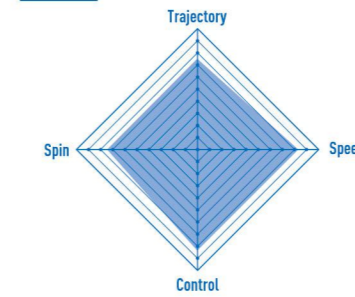

The VS>401 rubber offers the perfect balance between a tacky control rubber and a variable offensive rubber. The slightly more compact sponge neutralizes your opponent's attacks, thus providing for fantastic control. The High Energy Tension top rubber sheet also offers sufficient speed for sudden and dangerous attacks. VS>401 is the perfect tool for all-rounders who need sufficient power for their own attacks in addition to great control.

VO>103

MAX 2,0 1,8 1,6 39,90€

Hardness
40,0±3

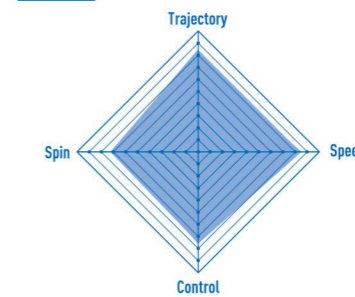

The VO>103 is the new benchmark for variable and dangerous short pips-out attacking! The new 40° High Energy Tension offensive sponge of the VO>103 with a fine catapult effect provides for excellent control both in attacking situations and passive play. The new pips design optimizes spin development and also produces great pips-out effect and a dangerous trajectory when blocking.

VO>102

MAX 2,0 1,8 39,90€

Hardness
37,5±3

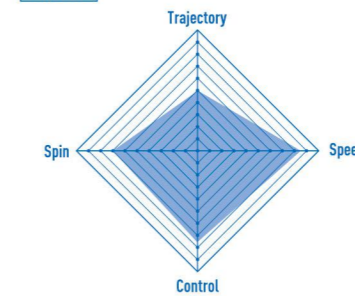

The geometry of the short and slightly wider pimples of this High Energy Tension pips-out rubber was optimized in a way that will enable you to create your own effective spin variations. The new pips design will also provide for direct ball feedback and excellent control. With the combination of an elastic sponge, High Energy Tension Technology, plus a pips-out top rubber sheet which is made for speed, VO>102 offers playing characteristics that will be an inspiration even for absolute top players.

VO>101

MAX 2,0 1,8 1,6 39,90€

Hardness
37,5±3

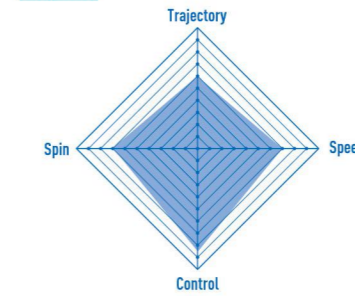

The VO>101 is a very fast and dangerous short pips-out rubber with built-in High Energy Tension Technology. The long experience of our Japanese pips-out experts and the know-how of our German researchers (GJ Tec) resulted in a high-tech rubber which leaves nothing to be desired for aggressive pips-out attackers. The new rubber sheet with optimized pips geometry produces a great pips-out effect, and the flat trajectory of the ball will put your opponent under pressure.

VLB>301

MAX 2,0 1,8 1,6 39,90€

Hardness
35,0±3

The VLB>301 is a soft High Energy Tension pips-out rubber made by VICTAS. The special geometry of the pimples designed by our Japanese pips-out experts (GJ Tec) enables the player to produce effective and dangerous topspin variations. The ultra-soft sponge combined with High Energy Tension Technology produces a high trajectory of the ball and fantastic sound.

*Please notice that there are two measurement standard for IN and OUT rubber. So please compare each rubber within the same type.
 *These numerical value were checked by VICTAS Inc. The feeling will be changed depending on the blade to be bonded and the environment of use, please use it as a reference.
 *All rubbers can be chosen from red and black colors.

EXPLANATION OF RUBBERS CHARACTER

Speed: Rate of change in speed before and after a collision with a rotated ball
Control: Accuracy of returning ball to the designated position for the rotated ball
Spin: Accuracy of operability when attack with top spin
Trajectory: Change in angle of incidence and reflection for the rotated ball
Sheet strength: Slip resistance against rolled ball

LIAM PITCHFORD

The new blade of the English superstar

ST

Liam Pitchford  

179,90€

Thickness: 5,9mm Weight: 90g±

FL

The blade played by English superstar, Liam Pitchford! The innovative Zxion carbon fiber which is placed directly under the outer ply gives this "Made in Japan" OFF blade outstanding vigor and power. The highly elastic Zxion carbon fiber boosts the impact energy of the ball, thus increasing energy transfer upon ball contact. This energy-rich, but still controllable, premium blade supports all attackers relying on aggressive power table tennis like Liam Pitchford.

QUARTET

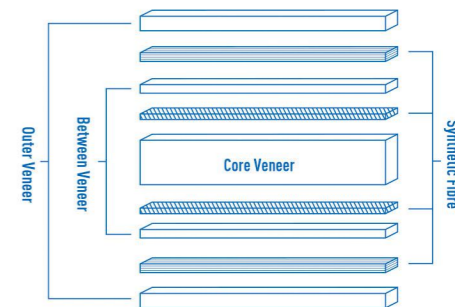

All VICTAS Quartet blades featuring DSE technology are based on 5 carefully selected wood veneers combined with 2 high-tech fibre materials. The Double Synergy Effect of the two synthetic fibre materials and the well-balanced wooden plies guarantees magnificent feel at high speed.

QUARTET

PERFECT HARMONY THANKS TO COMBINATION OF 4 SYNTHETIC FIBRES

In all VICTAS Quartet blades, the first synthetic fibre layer is applied directly on the core ply, which guarantees highly stable bouncing and produces great speed. The outer Fleece Carbon layer generates extra spin and great feel thanks to the slightly softer fibre texture.

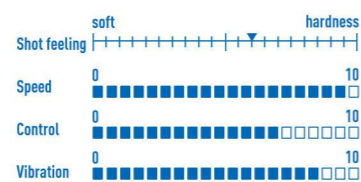

ST

QUARTET VFC

DSE 129,90€

Thickness: 5,3mm Weight: 88g±

In the development of Quartet VFC, the VICTAS material experts aimed at designing the perfect offensive blade. With V-Carbon, one of the hardest and toughest fibres in the world, Quartet VFC features enormous power and stability for ultimate precision even in the most difficult situations. This precision is perfectly complemented by the elasticity and spin potential of the outer Fleece Carbon layer. Enjoy unrivalled precision in passive playing situations and unlimited offensive creativity with the new Quartet VFC.

FL

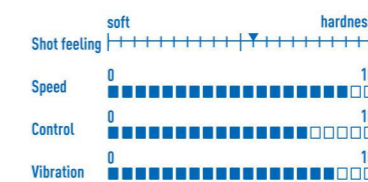

ST

QUARTET AFC

DSE 129,90€

Thickness: 5,5mm Weight: 91g±

Quartet AFC is a fast, high-quality offensive blade featuring excellent control thanks to well balanced DSE technology. An Aramid Carbon layer, a combination of elastic aramid and tough carbon fibres, is applied directly on the core ply of the Quartet AFC blade and provides for extra speed and stability. The outer Fleece Carbon layer increases the blade's spin potential and will give you an extraordinary level of control which you will hardly find in any other blade in this speed class.

FL

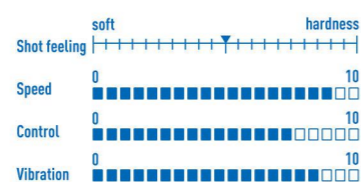

ST

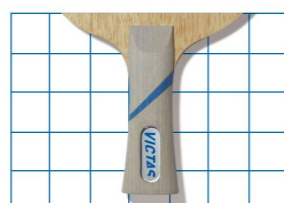

QUARTET LFC

DSE 129,90€

Thickness: 5,3mm Weight: 86g±

Quartet LFC is a very light blade with great feel for modern offensive players. By using the highly flexible Line Carbon synthetic fibre, the VICTAS designers were able to reduce the overall weight and thickness of Quartet LFC to approx. 86g and 5.3 mm, respectively. This optimized DSE design provides for great handling performance, giving any offensive player everything they need to take their play to a new level.

FL

ST

QUARTET SFC

DSE 129,90€

Thickness: 5,4mm Weight: 92g±

Quartet SFC distinguishes itself by its great feel and spin development. The ply structure of Quartet SFC was designed to provide spin-oriented offensive players with optimum ball contact feedback for precisely placed shots. The Silver Carbon layer on the core ply offers excellent speed development, while the softer Fleece Carbon provides strategic attackers with all the flexibility and feel they need.

FL

ZX-GEAR

NEW TYPE BLADE

The innovative new Zxion carbon fiber provides for a perfect combination of great power and unbelievable control.

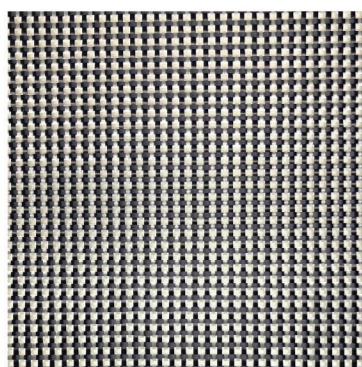

The new, extremely elastic Zxion carbon fiber, which was first used in the VICTAS ZX-Gear blade series, optimizes energy transfer upon ball contact and increases flexibility and stability at the same time.

Used for the first time in table tennis blades – innovative Zxion fiber

Zxion is a very robust but also very flexible synthetic fiber used by VICTAS in the ZX-Gear series blades for the first time. Zxion features similar stability and power as Aramid, but Zxion is significantly more flexible and elastic. Thanks to these properties, the new Zxion fiber combines power and speed with great feel and ultimate flexibility.

Fiber	Stability		Elasticity	
	G·Pa	cN/dtex	G·Pa	cN/dtex
Zxion*	3.1	22.0	85.0	600
Aramid	2.9	20.3	70.5	490

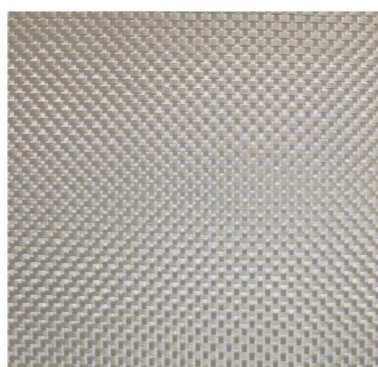

*comparison of Zxion and Aramid, evaluated and tested by KB Seiren Inc.

Z-Carbon

The combination of the Zxion fiber with carbon provides for an excellent balance of stability, flexibility and elasticity. For this reason, Z-Carbon is the perfect choice for players relying on powerful, yet very sensitive, attacking.

Blades using Z-Carbon

ZX-GEAR OUT

Dynamic Shell Effect

More power with DYNA-SHELL

The secret of VICTAS' DYNA-SHELL technology lies in the use of carefully chosen wood and synthetic fibers as well as in the special ply arrangement. The synthetic fiber which is placed directly under the top ply increases energy transfer to the ball and guarantees ultimate acceleration and power.

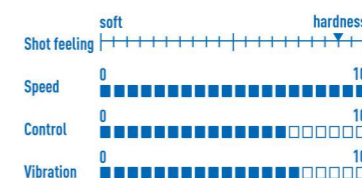

ST

ZX-GEAR OUT

119,90€

Thickness: 5,9mm Weight: 89g±

ZX-GEAR OUT is the new Power Off premium blade "Made in Japan". The innovative new Zxion carbon fiber which is placed directly under the outer ply provides for fantastic stability and power. This highly elastic carbon fiber boosts the impact energy of the ball and increases the energy transfer upon ball contact ("Rebound Effect"). The result is a fast premium offensive blade with ultimate Sweet Spot featuring a new definition of dynamics, explosiveness and precision.

FL

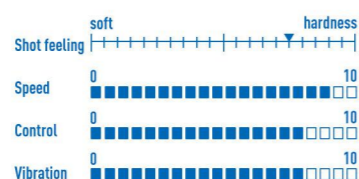

ST

ZX-GEAR IN

119,90€

Thickness: 5,9mm Weight: 89g±

ZX-GEAR IN is a new high-control premium blade "Made in Japan". The innovative new Zxion carbon fiber which is placed directly on the core ply provides for a perfect combination of great power and unbelievable control. This highly elastic carbon fiber optimizes energy transfer upon ball contact ("Rebound Effect") and increases flexibility and elasticity of this extraordinary offensive blade at the same time. In aggressive attacks, VICTAS ZX-GEAR IN provides for both fantastic speed and spin and consistently high control.

FL

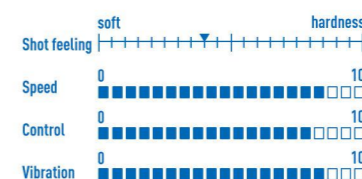

ST

ZX-GEAR FIBER

99,90€

Thickness: 5,7mm Weight: 85g±

ZX-GEAR FIBER is the first blade on the market equipped with a completely woven new Zxion fiber. This innovative, highly elastic material provides this Japanese premium offensive blade with a soft and controlled ball contact and sensational feeling. Thanks to the optimized, well-balanced ply structure in combination with the Zxion fiber, ZX-GEAR FIBER is ideal for close-to-the-table topspin playing and opens up a whole new dimension of precision, feeling and elasticity. In mid-distance rallies, the blade gears up significantly and produces all the speed you will need for attacking.

FL

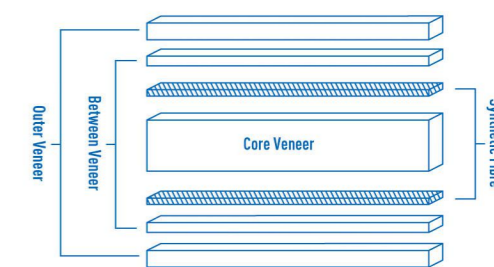

Fire Fall

All blades of the VICTAS Fire Fall series were developed based on the "Dynamic Core Effect" system: 5 carefully chosen wooden plies are combined with High-Tech fibre material placed directly on the plywood core, bringing together the speed of carbon fibre and the great feel of classic all-wood blades.

Fire Fall

The core of the Fire Fall blades is combined with an elastic and stable synthetic fibre (e.g. aramid-carbon). This is why VICTAS Fire Fall blades have more feel than other carbon blades in the OFF segment, without lacking the advantages of synthetic fibre materials (high stability, more speed). The Fire Fall series, like all other blades of the VICTAS brand, is distinguished by uncompromising premium workmanship.

ST

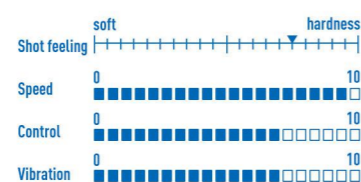

FL

Fire Fall AC

89,90€

Thickness: 6,6mm Weight: 88g±

The Fire Fall AC is the fastest blade of the VICTAS Fire Fall series. The high-quality aramid-carbon fibre which is placed directly on the plywood core provides this innovative offensive blade with a larger sweet spot and fantastic attacking speed. The combination of five carefully selected wooden plies with the stability and elasticity of aramid-carbon fibre make the Fire Fall AC a well balanced blade which will inspire any modern offensive player.

ST

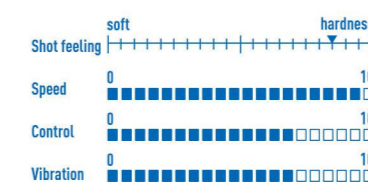

FL

Fire Fall VC

89,90€

Thickness: 6,4mm Weight: 92g±

The Fire Fall VC is a High-Tech product featuring innovative, aerospace-tested carbon technology. V-Carbon, one of the hardest and sturdiest carbon fibers in the world, offers exactly these properties. Thanks to this high-tech fiber, the blade has excellent stability, which greatly improves control in extreme situations. With the hardness and power of the V-Carbon fiber combined with five fine wood plies, the Fire Fall VC provides for outstanding acceleration for unlimited creativity and vigor in offensive play.

ST

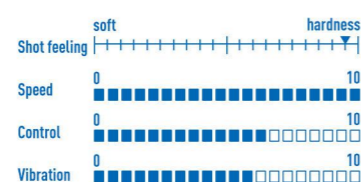

FL

Fire Fall HC

89,90€

Thickness: 6,2mm Weight: 89g±

Fire Fall HC is an uncompromising OFF blade for aggressive attackers. The secret of its unbelievable vigor and power is the new H-Carbon fiber which owes its stability and hardness to a new hexagon structure. With this innovation combined with carefully selected wooden plies, the VICTAS material experts succeeded in creating a whole new dimension of power and acceleration. Fire Fall HC demonstrates its superiority especially in topspin rallies and powerful mid-distance playing.

ST

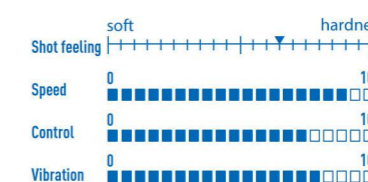

FL

Fire Fall SC

89,90€

Thickness: 6,2mm Weight: 93g±

The Fire Fall SC is a perfectly balanced offensive blade for modern attackers. Silver Carbon, a combination of elastic and stable carbon and aluminium fibres chosen by the VICTAS material experts, perfectly complements the 5-ply composition of the Fire Fall SC to form a true premium offensive blade. Fire Fall SC is made especially for variantrich and fast mid-distance topspin and counter-topsin.

ST

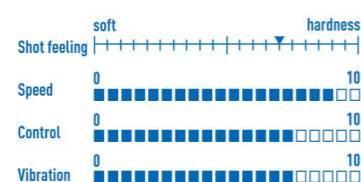

FL

Fire Fall LC

89,90€

Thickness: 6,0mm Weight: 88g±

The 7-ply structure of this offensive blade is based on the popular Fire Fall SC. Thanks to the new, even lighter and faster synthetic Line Carbon fiber, the overall weight of the blade is just about 85g. The Fire Fall LC combines perfectly balanced playing features, light weight and great speed. The blade offers enormous spin potential in topspin play.

ST

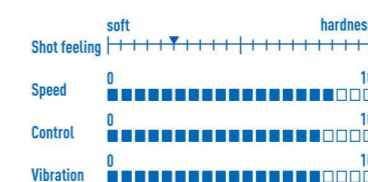

FL

Fire Fall FC

89,90€

Thickness: 6,0mm Weight: 82g±

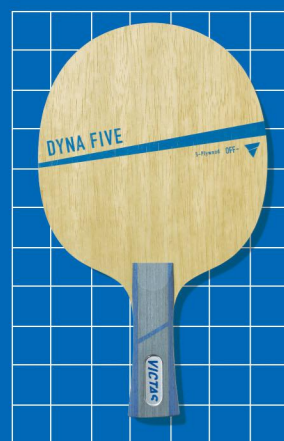

Fire Fall FC is the blade of the VICTAS Fire Fall series with the greatest feel. The well-balanced ply composition and the soft Fleece Carbon Fiber material of this OFF-blade which is placed directly on the plywood core provide for excellent, controlled feel in all playing situations. This premium workmanship offensive blade produces high speed and enables a higher ball trajectory at the same time. In serve / return as well as blocking / counter-attack situations, the Fire Fall FC is distinguished by a magnificent feel and unique touch.

DYNA SERIES

NEW TYPE BLADE

The VICTAS blade series for ultimate control and feel

The new Dyna series is the VICTAS blade series providing for the best control and feel. All blades of the series feature well-balanced properties, high-quality workmanship and offer great value for money.

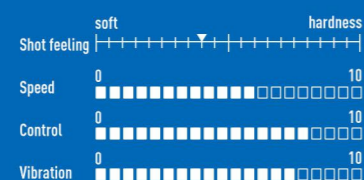

FL

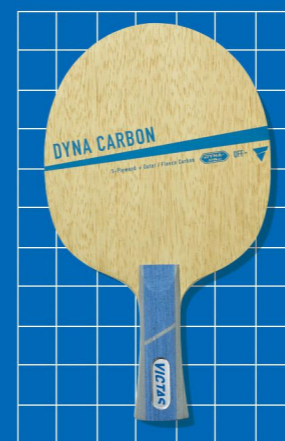

DYNA FIVE NEW

69,90€

Thickness: 6,2mm Weight: 85g±

The 5-ply design of DYNA FIVE guarantees an excellent speed/control balance. This high-quality blade has a large Sweet Spot and produces gentle vibration for an excellent feel and top control. DYNA FIVE is ideal for players relying on balanced variation of their play both in active and passive situations.

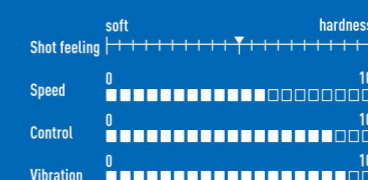

FL

DYNA CARBON NEW

79,90€

Thickness: 6,1mm Weight: 85g±

DYNA CARBON is a carbon supported controlled ALL/OFF blade. The well-balanced 5-ply design is combined with a flexible synthetic fiber. The elastic Fleece Carbon improves both stability and control of the blade, without affecting the typical playing features of an all-wood blade. DYNA CARBON thus makes switching to a carbon blade easy, as it combines the advantages of carbon fibers with the feel of all-wood blades.

ST

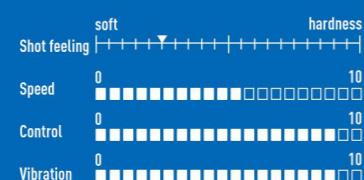

FL

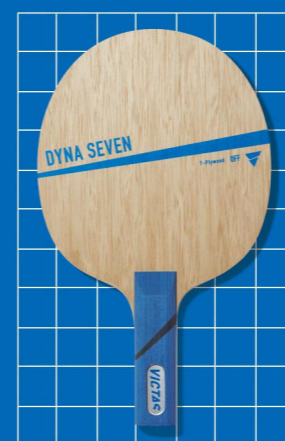

DYNA FIVE SOFT NEW

79,90€

Thickness: 5,7mm Weight: 85g±

DYNA FIVE SOFT is a high-control ALL blade "Made in Japan". The soft 5-ply design provides for a longer ball contact time and extraordinary feel. You will feel the vibration of DYNA FIVE SOFT which supports spin production and provides fantastic ball contact feedback which will give you all the control you need in any situation.

ST

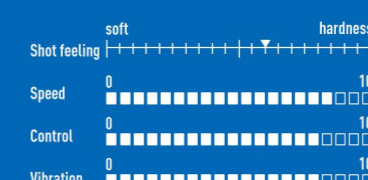

FL

DYNA SEVEN

69,90€

Thickness: 6,1mm Weight: 86g±

DYNA SEVEN is the new multi-talent among VICTAS' premium blades. Thanks to the extra-large Sweet Spot of the 7-ply Off-blade and the resulting high control, the DYNA SEVEN is the best choice for variant-rich and controlled attacking. The special ply-structure provides for excellent control / speed balance both in active attacking situations and for passive blocking or counter-hitting.

ST

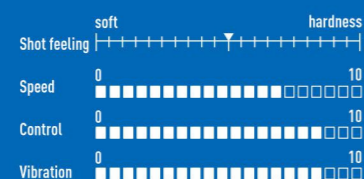

FL

DYNA FIVE HARD NEW

79,90€

Thickness: 5,8mm Weight: 85g±

DYNA FIVE HARD is a well-balanced ALL/OFF blade "Made in Japan". The slightly harder 5-ply design provides for a shorter ball contact time thus developing great acceleration and dynamics. DYNA FIVE HARD is a fine and well-balanced blade with optimized Sweet Spot which will also give you full control in passive situation.

KOJI MATSUSHITA

ST

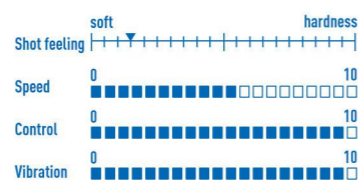

FL

KOJI MATSUSHITA

119,90€

Thickness: 5,4mm Weight: 87g±

Koji Matsushita, 4-times Olympic competitor and one of the world's most famous defenders, and the VICTAS team designed a defensive blade which has everything modern defensive strategists need. The perfectly adjusted, 5-ply structure made of carefully selected veneers (including high-quality Japanese cedar fir) provides for great control in away-from-the-table defensive play and in passive above-the-table play. Modern defenders who not only rely on their defensive qualities, but use every opportunity to attack, will be inspired by the VICTAS Koji Matsushita.

ST

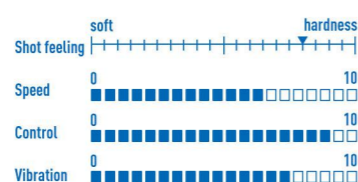

FL

KOJI MATSUSHITA OFFENSIVE

119,90€

Thickness: 6,0mm Weight: 93g±

The Koji Matsushita Offensive is the ideal blade for this type of players who rely on excellent control for defensive playing, but need good speed for their own attacking. The 5-ply design with a slightly harder outer mahogany ply provides for outstanding power second-to-none in the defensive blade segment, and gives any defender all the precision and control they need for passive playing.

ST

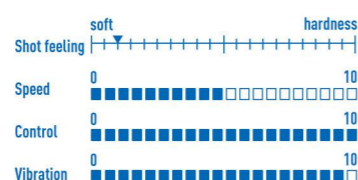

FL

KOJI MATSUSHITA DEFENSIVE

119,90€

Thickness: 5,0mm Weight: 84g±

Koji Matsushita Defensive is a premium-quality, Japanese defensive blade with excellent control features. Thanks to the especially thin, 5-ply structure, the VICTAS material experts succeeded in reducing the overall weight of the Koji Matsushita Defensive to just 85g, giving the blade outstanding balance and lightness. The "Silver Heart" outer ply absorbs the speed of your opponent's attacks providing you with great feel and ball control.

ST

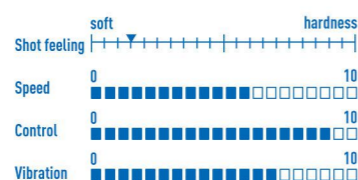

FL

KOJI MATSUSHITA SPECIAL

119,90€

Thickness: 5,6mm Weight: 90g±

The new Koji Matsushita Special made by VICTAS combines innovative engineering with the experience and passion of the legendary Japanese defender, Koji Matsushita. Almost zero-vibration bouncing thanks to Fleece Carbon providing great advantages: Optimum control in difficult situations thanks to large sweet spot and excellent speed potential for own attacks. The aggressive trajectory and high precision of your defense will put permanent pressure on your opponent.

YUTO MURAMATSU

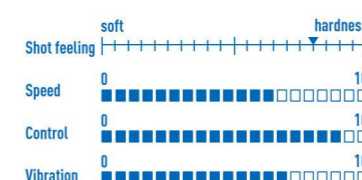

ST

YUTO MURAMATSU

119,90€

Thickness: 6,0mm Weight: 93g±

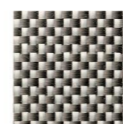

The Japanese shooting star Yuto Muramatsu was a key contributor to the development of this high-end blade. It is a fast DEF blade offering modern defenders, in addition to great reliability in defense, all they need to create their own sudden counter-attacks. The special White Mahogany outer ply of the 5-ply design harmonizes perfectly with Yuto's OFF power, while the VICTAS design team was also able to improve defense control and precision even further. Yuto Muramatsu is a VICTAS quality product "Made in Japan".

FL

HIGH-TECH CARBON MADE BY VICTAS:

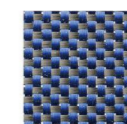

V-CARBON

One of the hardest synthetic fibres in the world, ideal for uncompromising offensive blades producing tons of power.

LINE CARBON

Very light non-woven carbon fibre for great flexibility and speed at low weight.

ARAMID CARBON

Combination of elastic aramid and tough carbon fibres. Develops great speed, aramid provides for good feel.

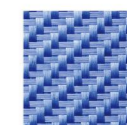

H-CARBON

Extra-hard carbon fiber with sophisticated hexagon structure. This stable carbon fiber is ideal for uncompromising OFF blades.

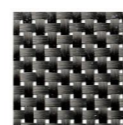

FLEECE CARBON

Non-woven carbon layer. More speed with good control.

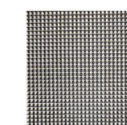

SILVER CARBON

Combination of carbon and aluminium fibres. Combines great feel with power.

CARBON

Lightweight and stable material often used in aircraft design. Develops great speed-ideal for direct attacks.

Z-CARBON

Combination of Zxion (high elasticity and very fine fiber) and carbon, which enhances repulsive force, allowing both play style: rigid and flexible.

Z-FIBER

It is made of only Zxion, which made of very elastic fiber with good elasticity. You can get good feeling of grasping the ball, enabling accurate hitting of a wide range of rackets.
